Acknowledgements:
The UM researchers wish to express our appreciation to the Mississippi Department of Education (Office of Healthy Schools) and Division of Child Nutrition for their support of this project.

This research was made possible by funding provided by the Center 4 Mississippi Health Policy and the Robert Wood Johnson Foundation.

Note: This is a preliminary draft of research outcomes which is for review and discussion and not intended for broad distribution, as some data measures may be added or modified prior to official distribution.

Mississippi School Nutrition Environment Evaluation Data System (MS NEEDS)

## MS NEEDS Weighting Procedures for Year 1

## SAMPLE DESCRIPTION:

See MS NEEDS Year 1 Report for detailed sampling method.

## RESPONSE RATE:

Year 1: 94\%-141 out of 150 sampled schools attended the survey.

## WEIGHTING:

A weight has been associated with each observation to reflect the likelihood of a school being selected, to reduce bias by compensating for differing school level of nonresponse, and to improve precision by making school sample distributions conform to known population distributions. The weight used for estimation is given by:

$$
\mathrm{W}=\mathrm{W}_{1} * \mathrm{f}_{1} * \mathrm{f}_{2}
$$

$\mathrm{W}_{1}=$ inverse of the probability of school selection.
$\mathrm{f}_{1}=$ a nonresponse adjustment factor calculated by school size (small, medium, or large) and school level (elementary, middle, or high school).
$\mathrm{f}_{2}=$ a poststratification adjustment factor calculated by school level (elementary, middle, or high school).

1. $W_{1}$ - inverse of the probability of school selection

There were a total of 1100 schools ( 538 elementary, 308 middle, and 254 high schools) in the Year 1 sampling frame. We randomly sampled 150 schools. The probability of selecting one school was 150/1100, so the inverse of the probability of school selection was 7.3333 (1100/150).

## 2. $f_{1}=a$ nonresponse adjustment factor

To calculate the nonresponse adjustment factor, we first obtained the number of schools participated the study by school level and size (Table 1). Based on Table 1, we calculated the response rates by school size within each school level. Nonresponse adjustment factors were the inverse of response rates (Table 2).

Table1. Schools Participated the Study by School Level and Size, MS NEEDS, Year 1

| School Level |  |  | School Size |  |  | Total |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | Small, $50-265$ | Medium, $266-475$ | Large, $476+$ |  |
| Elementary | Participated | Yes | 14 | 19 | 13 | 46 |
|  |  | No | 0 | 1 | 3 | 4 |
|  | Total |  | 14 | 20 | 16 | 50 |
| Middle | Participated | Yes | 28 | 12 | 7 | 47 |
|  |  | No | 2 | 0 | 1 | 3 |
|  | Total |  | 30 | 12 | 8 | 50 |
| High | Participated | Yes | 13 | 12 | 23 | 48 |
|  |  | No | 0 | 1 | 1 | 2 |
|  | Total |  | 13 | 13 | 24 | 50 |

Table 2. Nonresponse Adjustment Factors

| School Level | School Size | $\mathbf{n}$ | Response rate | $\mathbf{f}_{\mathbf{1}}$ |
| :--- | :--- | :---: | :--- | :---: |
| Elementary | Small (50-265) | 14 | $14 / 14=1.000$ | 1.0000 |
| Elementary | Medium (266-475) | 19 | $19 / 20=0.950$ | 1.0526 |
| Elementary | Large (476+) | 13 | $13 / 16=0.813$ | 1.2308 |
| Middle | Small (50-265) | 28 | $28 / 30=0.933$ | 1.0714 |
| Middle | Medium (266-475) | 12 | $12 / 12=1.000$ | 1.0000 |
| Middle | Large (476+) | 7 | $7 / 8=0.875$ | 1.1429 |
| High | Small (50-265) | 13 | $13 / 13=1.000$ | 1.0000 |
| High | Medium (266-475) | 12 | $12 / 13=0.923$ | 1.0833 |
| High | Large (476+) | 23 | $23 / 24=0.958$ | 1.0435 |

## 3. $f_{2}=a$ poststratification adjustment

The purpose of the post-stratification is to make the distribution of schools participated the study within each school level reflect those in the population. The $\mathbf{f}_{\mathbf{2}}$ were presented in Table 3.

Table 3. Post-stratification Adjustment

| School <br> Level | Population <br> $(\mathbf{N})$ | Population <br> $(\%)$ | Sample (n) | Sample <br> $(\%)$ | $\mathbf{f}_{\mathbf{2}}$ |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Elementary | 538 | 48.9 | 46 | 32.6 | 1.5000 |
| Middle | 308 | 28.0 | 47 | 33.3 | 0.8408 |
| High | 254 | 23.1 | 48 | 34.1 | 0.6774 |
| Total | 1100 | 100 | 141 | 100 |  |

## School Level Distribution after Weighting

Table 4. Comparison of School Level Distribution before and after Weighting

|  |  | Unweighted |  | Weighted |  |
| :--- | :--- | :---: | :---: | :---: | :---: |
|  |  | School Level | n | $\%$ | n |

We used the same weighting procedure to weight year 2 data

## Methods for Comparisons

The two years' weighted datasets were combined into one master file. A "year" variable was assigned to represent Year1 and Year2 data. For categorical variables, Chi-Square Test was applied to compare proportions in Year1 and Year2. For continuous outcome variables, PROC GLM procedure in SAS was applied to compare means. A p-value less than 0.05 indicated a significant difference on the estimates between the two years. In addition, percent changes [(Year1-Year2)/Year1] were calculate for the selected estimates. A positive number of percent changes indicated an increase, while a negative number indicates a decrease from Year 1 to Year 2.

The statistics generated using weighted data may differ from those using non-weighted data.

## RESULTS

The results are presented by sections which correspond to the main policy points from the MS Health Students Act as described above.

## Section A: Healthy Food and Beverage Choices

## Policy Point A.1: A minimum of one fresh fruit or vegetable choice should be offered to students each day.

Table 1. Percent of schools that served at least one fresh fruit or vegetable at lunch.

| Source and Indicator | Year 1 | Year 2 | \% change | $p$ value* |
| :--- | :---: | :---: | :---: | :---: |
| Interview | $(\mathrm{n}=141)$ | $(\mathrm{n}=153)$ |  |  |
| Percent of schools that served at least <br> one fresh fruit or vegetable all 5 days <br> of the week for 4 weeks | 59.8 | 35.6 | -40.5 | $<0.0001$ |
| Observation | $\mathbf{( n = 1 4 1 )}$ | $\mathbf{( n = 1 5 3 )}$ |  | 0.05 |
| Percent of schools that served at least <br> one fresh fruit or vegetable at any time <br> on the day of observation. | 81.6 | 84.7 | 3.8 | $<0.0001$ |
| Percent of schools that served at least <br> one fresh fruit or vegetable for the <br> entire lunch period on the day of <br> observation | 51.9 | 60.9 | 17.3 |  |

* $p$ value $<=0.05$ is regarded as statistically significant.

Compared to year 1, there is significant in the percentage of schools that served at least one fresh fruit or vegetable on at least one time on the day of observation.

Compared to year 1, there is significant increase in the percentage of schools that served at least one fresh fruit or vegetable for the entire lunch period on the day of observation

Table 2. Availability of fresh fruits vs. fresh vegetables

| Source and Indicator | Year 1 | Year 2 | \% change | $p$ value |
| :--- | :---: | :---: | :--- | :---: |
| Production Records | $\mathbf{( n = 1 4 1 )}$ | $(\boldsymbol{n}=\mathbf{1 5 3})$ |  |  |
| Percent of schools that served at least <br> one fresh fruit all 5 days of the week <br> for 4 weeks | 22.3 | 21.9 | -1.8 | 0.83 |
| Percent of schools that served at least <br> one fresh vegetables all 5 days of the <br> week for 4 weeks | 8.4 | 9.5 | 13.1 | 0.38 |
| Observation | $\mathbf{( n = 1 4 1 )}$ | $\mathbf{( n = 1 5 3 )}$ |  | $<0.0001$ |
| Percent of schools that served at least <br> one fresh fruit at any time on the day of <br> observation | 68.9 | 77.0 | 11.8 | 0.57 |
| Percent of schools that served at least <br> one fresh vegetable for the entire lunch <br> period on the day of observation | 29.8 | 30.9 | 3.7 |  |

Compared to year 1 , there is significant increase in the percent of schools that served at least one fresh fruit at least one time on the day of observation

## Policy Point A.2a: School menus shall offer a minimum of three different fruits weekly.

Table 3. Variety of fruit types served weekly at lunch.

| Source and Indicator | Year 1 | Year 2 | \% change | $p$ value |
| :--- | :---: | :--- | :--- | :---: |
| Production Records | $\mathbf{( n = 1 3 9 )}$ | $\mathbf{( n = 1 5 2 )}$ |  |  |
| Percent of schools that served a <br> minimum of 3 different fruits per week <br> for 4 weeks | 93.4 | 97.7 | 4.6 | $<0.0001$ |
| Average number of fruit types served <br> per week (over the 4 week period) | 7.1 | 7.1 | 0.0 | 0.69 |

NOTE: Types of fruits included were canned, frozen, pre-prepared, and dried.
Compared to year 1, there is significant increase in the percent of schools that served a minimum of 3 different fruits per week for 4 weeks; However, the average number of fruit types served per week over the 4 week period did not change.

Policy Point A.2b: School menus shall offer a minimum of five different vegetables weekly.
Table 4. Variety of vegetable types served weekly at lunch.

| Source and Indicator | Year 1 | Year 2 | \% change | $p$ value |
| :--- | :--- | :--- | :--- | :--- |
| Production Records | $\mathbf{( n = 1 3 9 )}$ | $\mathbf{( n = 1 5 2 )}$ |  |  |
| Percent of schools that served a <br> minimum of 5 different vegetables per <br> week for 4 weeks | 86.5 | 86.1 | -0.5 | 0.78 |
| Average number of vegetable types <br> served per week (over the 4 week <br> period) | 8.2 | 7.9 | -3.7 | 0.30 |

Note: Types of vegetable included were canned, frozen, and pre-prepared.
Policy Point A2.3: Schools should try to serve dark green vegetable and/or orange fruits three times per week.

The MHS Act does not identify what comprises dark green and/or orange vegetables and fruits. For Year 1, the MS NEEDS team created a list based off of ??? For Year 2, the list used was based on the Institute of Medicine's recommendations and obtained from the Mississippi Department of Education, Office of Child Nutrition.

Policy Point A.3: Flavored nonfat, low-fat, or reduced-fat milk shall contain no more than 160 calories per 8-ounce serving.

Table 5. Types of milk served at lunch.

| Source and Indicator | Year 1 | Year 2 |
| :--- | :--- | :--- |
| Observation | $(\boldsymbol{n}=\mathbf{1 4 1})$ | $(\boldsymbol{n}=\mathbf{1 5 3})$ |
| Percent of schools met the criteria for all <br> milk items served at all lunches. | 100 | 99.4 |
| Percent of schools that served a type of <br> white milk |  |  |
| Non-fat | 25.8 | 21.8 |
| 1\% fat | 10.5 | 8.0 |
| 2\% fat | 97.1 | 85.1 |
| Percent of schools that served a type of |  |  |
| flavored milk | 8.7 | 15.0 |
| Non-fat | 92.9 | 93.9 |
| 1\% fat | 11.9 | 3.3 |
| 2\% fat |  |  |

All schools sampled in year 1 meet the criteria for all milk items served at all lunches; Only one school out of the year 2 sampled schools did not meet the criteria for all milk items served at all lunches.

Policy Point A.4: Schools shall only offer $\mathbf{1 0 0 \%}$ fruit and vegetable juice with no added sugar.
Table 6. Types of juice served at lunch.

| Source and Indicator | Year 1 | Year 2 | \% change | $p$ value |
| :--- | :--- | :--- | :--- | :---: |
| Observation | $\mathbf{n = 1 4 1})$ | $(\boldsymbol{n}=\mathbf{1 5 1})$ |  |  |
| Percentage of schools serving juice | 66.7 | 74.2 | 11.2 | $<0.0001$ |
| Of the schools serving juice, percent <br> that met the criteria for all juice items <br> served at all lunches | 99.1 | 97.4 | -1.7 | 0.02 |

Compared to year 1, there is significant increase in the percentage of schools serving juice.
Of the schools serving juice, compared to year 1, there is significant decreased in the percent that met the criteria for all juice items served at all lunches.

## Section B: Healthy Food Preparation

Policy Point B.1: Schools shall comply with the existing NSLP/SBP meal pattern requirements.

Table 7. Use of meal patterns complying with NSLP.

| Source and Indicator | Year 1 | Year 2 | \% change | $p$ value |
| :--- | :--- | :--- | :--- | :--- |
| Interview | $\mathbf{( n = 1 4 1 )}$ | $\mathbf{( n = 1 5 3 )}$ |  |  |
| Percent of schools that reported using a <br> valid meal pattern | 100 | 97.7 | -2.3 | $<0.0001$ |
| Percent of schools using listed meal |  |  |  |  |
| pattern |  |  |  |  |
| MS Cycles II (recipes or menus) | 80.8 | 95.3 | 17.9 | $<0.0001$ |
| Traditional | 3.1 | 6.6 | 112.9 | $<0.0001$ |
| Nutrient Standard | 1.6 | 1.6 | 0.0 | 0.93 |
| NutriKids | 38.0 | 31.5 | -17.1 | $<0.01$ |
| Other Meal Pattern | 5.4 | 5.4 | 0.0 | 0.95 |

Table 8. HACCP plan and compliance with individual appliance types.

| Indicator | Year 1 |  | Year 2 |  | $\%$ <br> change | $p$ value |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: |
| Observation | $\mathrm{n}^{\mathrm{a}}$ | $\%$ | $\mathrm{n}^{\mathrm{a}}$ | $\%$ |  |  |
| Percent of schools that documented the |  |  |  |  |  |  |
| temperature in the preceding 24 hours |  |  |  |  |  |  |
| for all "back of house:": |  |  |  |  |  |  |
| $\quad$ Kitchen refrigerators | 139 | 91.6 | 153 | 91.4 | -0.2 | 0.83 |
| $\quad$ Kitchen freezers | 139 | 93.5 | 152 | 94.1 | 0.6 | 0.84 |
| $\quad$ Food warmers | 138 | 68.3 | 114 | 50.5 | -26.1 | $<0.0001$ |
| $\quad$ Kitchen storerooms | 99 | 75.2 | 152 | 81.6 | -7.5 | $<0.0001$ |
| $\quad$ Kitchen dishwashing |  |  |  | 56.7 | -24.5 | $<0.0001$ |
|  |  |  |  |  |  |  |
| Percent of schools that documented the |  |  |  |  |  |  |
| temperature in the preceding 24 hours |  |  |  |  |  |  |
| for all "front of house": | 139 | 85.0 | 153 | 79.1 | -6.9 | $<0.001$ |
| $\quad$ Service tray lines | 138 | 81.4 | 150 | 76.9 | -5.5 | 0.01 |
| $\quad$ Service refrigerators | 73 | 69.5 | 99 | 49.6 | -28.6 | $<0.0001$ |
| Service freezers | 61 | 72.9 | 64 | 64.6 | -11.4 | $<0.01$ |
| Food warmers |  |  |  |  |  |  |
|  |  |  |  |  |  |  |

[^0]Policy Point B.2c: Schools shall include in their School Wellness Policy (SWP) a food safety assurance program for all food offered to students through sale or service.

Table 9. Percent of schools that included a food safety assurance program in their SWP.

| Source and Indicator | Year 1 | Year 2 | \% change | $p$ value |
| :--- | :--- | :--- | :--- | :---: |
| Interview | $\mathbf{( n = 1 3 6 )}$ | $\mathbf{( n = 1 5 3 )}$ |  |  |
| Percent of schools with CNP manager <br> answering "yes" | 86.0 | 56.5 | -34.3 | $<0.0001$ |

NOTE: CNP managers not always aware of the inclusion of food safety in the SWP. Percents were arrived at through interview and confirmation through SWP documents.

Policy Point B.3: Schools shall secure a Food Service Operational Permit through the Mississippi State Department of Health for approval to operate under NSLP/SBP.

Table 10. Percent of schools that had a valid operational permit on display in kitchen.

| Source and Indicator | Year 1 | Year 2 | \% change | $p$ value* |
| :--- | :--- | :--- | :--- | :--- |
| Observation | $\mathbf{( n = 1 4 0})$ | $(\boldsymbol{n}=\mathbf{1 5 3})$ |  |  |
| Percent Yes | 99.4 | 97.9 | -1.5 | 0.0037 |
| Schools with A permit | 77.1 | 82.1 | 6.5 | 0.4993 |
| Schools with B permit | 22.3 | 15.8 | -29.1 | 0.0001 |

*Results indicate that there is an overall drop in the percentage of schools having Food Service Operation Permit, and the drop is due to decrease of B permit percentage, while A permit percentage had not changed significantly.

Policy Point B.4: Mississippi Department of Health conducts two School Food Facility Inspections per site each school year.

Table11. Percent of schools that had two or more facility inspections in past year.

| Source and Indicator | Year 1 | Year 2 | \% change | $p$ value* $^{(1)}$ |
| :--- | :--- | :--- | :--- | :--- |
| Interview | $\mathbf{( n = 1 1 7 )}$ | $\mathbf{( n = 1 5 3 )}$ |  |  |
| Percent of schools with inspections in <br> the past year: <br> 0 inspections <br> 1 inspection <br> 2 or more inspections | 0.5 |  |  |  |

Policy Point B.5a: Schools shall implement healthy school food preparation techniques using training materials developed through sources such as USDA, National Food Service Management Institute or Mississippi Department of Education.

Table 12. Materials schools used for healthy food preparation training.

| Source and Indicator | Year 1 | Year 2 | \% change | $p$ value |
| :--- | :--- | :--- | :--- | :--- |
| Interview | $(\boldsymbol{n = 1 4 0})$ | $(\boldsymbol{n = 1 5 3 )}$ |  |  |
| Percent of schools that used valid <br> training materials | 89.9 | 89.6 | -0.3 | 0.83 |
| Percent of schools using the following <br> training materials: |  |  |  |  |
| $\quad$ USDA | 34.9 | 48.0 | 8.9 | $<0.0001$ |
| NFSMI | 37.6 | 33.7 | -10.4 | 0.05 |
| MDE | 52.0 | 61.0 | 17.3 | $<0.0001$ |
| Other | 53.9 | 28.0 | -48.1 | $<0.0001$ |
| No sources used | 10.1 | 10.4 | 3.0 | 0.83 |

Policy Point B.6a: Schools should limit fried foods whenever possible and practical.
Table 13. Number of fried food items per week served with reimbursable lunch.

| Source and Indicator | Year 1 | Year 2 | \% change | $p$ value |
| :--- | :--- | :--- | :--- | :--- |
| Interview | $(\boldsymbol{n}=\mathbf{1 4 1})$ | $(\boldsymbol{n}=\mathbf{1 5 3})$ |  |  |
| Percent of schools serving, on average, <br> this number of fried items per week <br> with the reimbursable lunch meal |  |  |  |  |
| 3 or more items/week | 9.1 | 11.4 | 25.3 |  |
| 2 items/week | 17.1 | 15.9 | -7.0 |  |
| $\quad$ 1 item/week | 27.2 | 23.3 | -14.3 |  |
| $\quad$ Less than 1 item/week | 19.6 | 15.0 | -23.5 |  |
| $\quad$ No fried food items | 27.1 | 34.5 | 27.3 |  |
| Percent of schools where fried items |  |  |  | $<0.0001$ |
| with the reimbursable lunch meal: |  |  |  |  |
| $\quad$ Stayed the same (No fried food) | 15.4 | 28.0 | 81.8 |  |
| Stayed the same (Some fried food) | 25.1 | 23.5 | -6.4 |  |
| Decreased in the last year | 58.8 | 47.6 | -19.1 |  |
| $\quad$ Increased in the last year | 0.6 | 0.9 | -50 |  |

Policy Point B.6b: Schools shall develop a long range plan for reducing and/or eliminating fried products in their lunch and breakfast menus.

Table 14. Percent of schools that have developed a long range plan to reduce fried foods.

| Source and Indicator | Year 1 | Year 2 | \% change | $p$ value |
| :--- | :--- | :--- | :--- | :---: |
| Interview | $\mathbf{( n = 1 3 9 )}$ | $\mathbf{( n = 1 5 1 ~ )}$ |  |  |
| Percent of schools with Plan | 61.3 | 44.2 | -27.9 | $<0.0001$ |
| Percent of schools who do not serve <br> fried foods | 17.7 | 27.2 | 53.7 | $<0.0001$ |
| Percent of schools with no plan or CNP <br> manager unaware of a plan | 21.0 | 28.6 | 35.7 | $<0.0001$ |

Policy Point B.6c: The long range plan should include preparation methods using existing equipment and/or goals to replace fryers with combi-oven/steamers as budgets allow.

Table 15. Schools with plans to replace fryers.

| Source and Indicator | Year 1 | Year 2 | \% change | $p$ value |
| :--- | :--- | :--- | :--- | :---: |
| Interview | $(\boldsymbol{n}=\mathbf{1 4 1})$ | $(\boldsymbol{n}=\mathbf{1 4 9})$ |  |  |
| Percent of schools whose long range <br> plan replaces fryers with steamers <br> and/or combi-ovens | 60.0 | 46.4 | -22.7 | $<0.0001$ |
| Percent of schools whose long range |  |  |  |  |
| plan replaces fryers with: | 50.8 | 35.8 | -29.5 |  |
| $\quad$ Combi-ovens only | 1.6 | 2.9 | 81.3 |  |
| Steamers only | 7.6 | 7.6 | 0.0 |  |
| Combi-ovens and steamers | 12.4 | 18.4 | 48.4 |  |
| Neither | 7.1 | 14.9 | 109.9 |  |
| Unclear | 20.6 | 20.4 | -0.01 |  |
| Not applicable |  |  |  |  |
|  |  |  |  |  |
|  |  |  |  |  |

Table 16. Equipment available for meal production in schools

| Source and Indicator | Year 1 | Year 2 | \% change | $p$ value |
| :--- | :--- | :--- | :--- | :--- |
| Observation | $\mathbf{( n = 1 4 1})$ | $(\boldsymbol{n}=\mathbf{1 5 3})$ |  |  |
| Percent of schools with a minimum of |  |  |  |  |
| one working: | 81.7 | 62.6 | -23.4 | $<0.0001$ |
| $\quad$ Fryer | 31.3 | 35.3 | 12.8 | 0.04 |
| $\quad$ Combi-oven | 67.9 | 64.7 | -4.7 | 0.12 |
| $\quad$ Steamer |  |  |  |  |

NOTE: In year 1, it was noted that many schools that had fryers were not using the fryers for meal production. Therefore, in year 2 , consultants were instructed to count only working fryers.

## Section C: Marketing of Healthy Food Choices to Students and Staff

Policy Point C.1: Train School Foodservice Administrators, Kitchen Managers, and Cooks in Marketing, New Cooking Techniques, and Garnishing using available or newly developed training tools, such as Marketing Sense - Mississippi Department of Education, Office of Child Nutrition.

Table 17. Percent of schools whose food service staff attended trainings in last 12 months.

| Source and Indicator | Year 1 | Year 2 | \% change | $p$ value |
| :--- | :---: | :---: | :--- | :---: |
| Interview | $\mathbf{( n = 1 4 1 ~ )}$ | $\mathbf{( n = 1 5 3 )}$ |  |  |
| Percent of schools that reported having <br> the CNP manager attend at least one <br> training in the last 12 months | 82.7 | 66.3 | -19.8 | $<0.0001$ |
| Percent of schools that reported having <br> at least one kitchen staff member attend <br> at least one training in the last 12 <br> months | 67.4 | 54.6 | -19.0 | $<0.0001$ |

Table 18. Types of trainings attended by school food service staff.

| Source and Indicator | Year 1 | Year 2 | \% change | $p$ value |
| :--- | :--- | :--- | :--- | :--- |
| Interview | $\mathbf{( n = 1 4 1})$ | $\mathbf{( n = 1 5 3 ~ )}$ |  |  |
| Percent of schools whose CNP |  |  |  |  |
| Manager attended a training on: | 34.8 | 21.8 | -37.4 | $<0.0001$ |
| $\quad$ Marketing | 16.0 | 16.3 | 1.9 | 0.07 |
| New cooking techniques | 23.9 | 18.1 | -24.3 | $<0.001$ |
| Garnishing | 54.0 | 50.6 | -6.3 | 0.02 |
| Other |  |  |  |  |
|  |  |  |  |  |
| Percent of schools whose kitchen staff |  | 13.4 | 38.1 | $<0.0001$ |

## Section D: Food Preparation Ingredients and Products

Policy Point D.1: School districts shall adopt the Dietary Guideline recommendation that trans fatty acids will be kept "as low as possible".

Table 20. School Emphasis on reduction of trans fatty acids.

| Source and Indicator | Year 1 | Year 2 <br> Interview | \% change | $p$ value |
| :--- | :--- | :--- | :--- | :--- |
| Percent of schools reporting that | $(\boldsymbol{n = 1 5 1})$ |  |  |  |
| nutrient analyses address trans-fat in: |  |  |  |  |
| Lunch menus only | 40.7 | 60.7 | 49.1 | $<0.0001$ |
| Breakfast menus only | 14.2 | 36.8 | 159.2 | $<0.0001$ |
| Lunch and breakfast menus | 26.9 | 19.7 | -26.8 | $<0.0001$ |
| Neither menu | 47.4 | 12.1 | -74.5 | $<0.0001$ |
| Respondent unsure for lunch | 10.5 | 36.3 | 245.7 | $<0.0001$ |
| Respondent unsure for breakfast | 10.7 | 40.4 | 277.6 | $<0.0001$ |

NOTE: It was identified that the nutrient analysis included with the MS Cycles II menus does not include trans fat. An alternative means of nutrient analyses would need to be conducted to identify the trans fat in the school lunch menu.

Policy Point D.2: Wherever possible and practical, school lunch and breakfast programs shall include products that are labeled " 0 " grams trans fat.

Table 21. Percent of schools incorporating "0 trans fat" products into meal program foods.

| Source and Indicator | Year 1 | Year 2 | \% change | $p$ value |
| :---: | :---: | :---: | :---: | :---: |
| Interview | ( $n=136$ ) | ( $n=134$ ) |  |  |
| Of the schools made attempts to include " 0 trans fat" products, percent that incorporated at least one " 0 trans fat" product into: <br> Lunch menus only <br> Breakfast menus only <br> Lunch and breakfast menus <br> Neither menu | $\begin{aligned} & 18.9 \\ & 3.9 \\ & 25.2 \\ & 52.0 \end{aligned}$ | $\begin{aligned} & 17.3 \\ & 7.3 \\ & 27.6 \\ & 47.8 \end{aligned}$ | $\begin{aligned} & -8.5 \\ & 87.2 \\ & 9.5 \\ & -8.1 \end{aligned}$ | $\begin{aligned} & 0.35 \\ & 0.0009 \\ & 0.21 \\ & 0.06 \end{aligned}$ |
| Observation | ( $n=140$ ) | ( $n=153$ ) |  |  |
| Percent of schools at which a product labeled "0 trans fat" was observed at lunch (a la carte or reimbursable meal) | 31.2 | 47.7 | 52.9 | <0.0001 |

Table 22. Availability of "0 trans fat" options

| Source and Indicator | Year 1 | Year 2 | \% change | $p$ value |
| :--- | :--- | :--- | :--- | :--- |
| Interview | $\mathbf{( n = 1 3 3 )}$ | $\mathbf{( n = 1 4 8})$ |  |  |
| Percent of schools that learned which <br> state bid products are "0 trans fat" from <br> the State Child Nutrition Program <br> office. | 32.2 | 31.4 | -2.5 | 0.72 |

Policy Point D.3: Schools shall incorporate whole grain products into daily and weekly lunch and breakfast menus based on product availability and student acceptability.

Table 23. Percent of schools incorporating whole grain products into meal program foods.

| Source and Indicator | Year 1 | Year 2 | \% change | $p$ value |
| :--- | :--- | :--- | :--- | :--- |
| Interview | $\mathbf{( n = 1 4 0})$ | $\mathbf{( n = 1 5 2 ~ )}$ |  |  |
| Percent of schools that incorporated at <br> least one whole grain product into: <br> Lunch menus only <br> Breakfast menus only <br> $\quad$ Lunch and breakfast menus <br> $\quad$ Neither menu | 17.0 | 18.3 | 7.6 | 0.40 |
|  | 3.1 | 2.3 | -34.8 | 0.21 |
| Observation | 8.1 | 75.8 | 5.6 | 0.03 |
| Percent of schools that served a <br> minimum of one whole grain product in <br> at least one lunch | 35.5 | 3.6 | -55.5 | $<0.0001$ |

Table 24. Availability of whole grain options

| Source and Indicator | Year 1 | Year 2 | \% change | $p$ value |
| :--- | :--- | :--- | :--- | :---: |
| Interview | $\mathbf{( n = 1 3 3 )}$ | $\mathbf{( n = 1 5 0 )}$ |  |  |
| Percent of schools that learned which <br> state bid products are whole grain from <br> the State Child Nutrition Program <br> office. | 67.0 | 58.0 | -13.4 | $<0.0001$ |

Section E: Minimum and Maximum Time Allotment for Students and Staff at Breakfast and Lunch Periods

Policy Point E.1: Schools shall schedule at least a minimum of $\mathbf{2 4}$ minutes to ensure an adequate eating time for school lunch.

Table 25. Percent of schools at which students have enough time to eat lunch.

| Source and Indicator | Year 1 | Year 2 | \% change | $p$ value |
| :--- | :---: | :--- | :--- | :---: |
| Interview | $(\boldsymbol{n}=\mathbf{1 4 0})$ | $(\boldsymbol{n}=\mathbf{1 5 3})$ |  |  |
| Frequency with which students have <br> adequate time to eat their school lunch <br> meal (\% schools): <br> None of the time <br> Some of the time <br> Most of the time <br> Always |  |  |  | $<0.0001$ |
| Observation | 0.0 | 2.5 | NA |  |
| Percent of schools providing at least 24 <br> minutes for all lunches | $\mathbf{2 1 . 1}$ | 25.4 | 20.4 |  |

NOTE: Some uncertainty as to the required number of minutes required for lunch times. Some schools identified 18 minutes as the minimum time allowed.

Policy Point E.2: Schools should take into consideration the recommend time of $\mathbf{1 0}$ minutes for a child to eat school breakfast after they have received the meal.

Table 26. Percent of schools at which students have enough time to eat breakfast.

| Source and Indicator | Year 1 | Year 2 <br> (n=148 ) | \% change | $p$ value |
| :--- | :--- | :--- | :--- | :---: |
| Frequency with which students have |  |  |  |  |
| adequate time to eat their school |  |  |  | $<0.0001$ |
| breakfast meal (\% schools): | 0.6 | 3.2 | 433.3 |  |
| None of the time | 1.7 | 2.8 | 64.7 |  |
| Some of the time | 12.6 | 14.6 | 15.9 |  |
| Most of the time | 83.3 | 79.4 | -4.7 |  |
| Always |  |  |  |  |

Section F: The Availability of Food Items during the Lunch and Breakfast Periods of the Child Nutrition Breakfast and Lunch Programs

Policy Point F.1: Schools districts shall comply with the Mississippi Board of Education Policy of Competitive Food Sales as outlined in Mississippi Board of Education Policies.

Table 27. Percent of schools complying with Competitive Food Sales Policy on times of day competitive foods are available.

| Source and Indicator | Year 1 | Year 2 | \% change | $p$ value |
| :---: | :---: | :---: | :---: | :---: |
| Interview | ( $n=139$ ) | ( $n=151$ ) |  |  |
| Percent of schools reporting that no competitive food sales are made within 1 hour of any meal | 80.6 | 78.2 | -5.2 | 0.01 |
| Number of schools selling foods in the hour before breakfast via: <br> Vending machines <br> School stores <br> Fundraisers <br> Teacher sales <br> Other | $\begin{aligned} & 8 \\ & 3 \\ & 2 \\ & 1 \\ & 1 \end{aligned}$ | 4 2 1 1 6 |  |  |
| Number of schools selling foods in the hour before lunch via: <br> Vending machines <br> School stores <br> Fundraisers <br> Teacher sales <br> Other | $\begin{aligned} & 6 \\ & 6 \\ & 2 \\ & 1 \\ & 3 \end{aligned}$ | $\begin{aligned} & 1 \\ & 10 \\ & 0 \\ & 2 \\ & 4 \end{aligned}$ |  |  |
| Observation-Vending | ( $\mathrm{n}=77$ ) | ( $n=63$ ) |  |  |
| Number of schools observed selling competitive foods the hour before lunch in these locations: <br> Hallway <br> Outside on school grounds <br> Faculty lounge <br> Gym/locker room vending <br> Cafeteria <br> Other | $\begin{gathered} 30 \\ 21 \\ 16 \\ 13 \\ 5 \\ 0 \end{gathered}$ | $\begin{gathered} 23 \\ 8 \\ 46 \\ 6 \\ 2 \\ 5 \end{gathered}$ |  |  |

Table 28. Percent of schools complying with Competitive Food Sales Policy allowing students to purchase water and milk without purchasing a reimbursable meal.

| Source and Indicator | Year 1 | Year 2 | \% change | $p$ value |
| :--- | :--- | :--- | :--- | :--- |
| Observation | $\mathbf{( n = 1 4 1})$ | $(\boldsymbol{n}=\mathbf{1 5 2})$ |  |  |
| Percent of schools observed where a <br> student purchased a milk or water <br> product without a meal | 44.8 | 47.1 | 5.1 | 0.29 |

NOTE: These percentages only reflect direct observation by the data collector.

Policy Point F.2: School districts shall update the wellness policy to address limiting the number of extra sale items that may be purchased with a reimbursable meal. This policy will exclude extra beverage purchases of milk, juice and/or water.

Table 29. Percent of schools incorporating this policy into the School Wellness Policy.

| Source and Indicator | Year 1 | Year 2 | \% change | $p$ value |
| :--- | :--- | :--- | :--- | :---: |
| Interview | $\mathbf{( n = 1 3 0})$ | $\mathbf{( n = 1 5 2 )}$ |  |  |
| Percent of schools that incorporated <br> this policy into their School Wellness <br> Policy | 46.5 | 31.7 | -31.8 | $<0.0001$ |
| Percent of schools where the CNP <br> answered "not sure"/"do not know" to <br> this question | 3.3 | 44.2 | 1239 | $<0.0001$ |

Policy Point F.3: Schools may sell extra items in individual packages not to exceed 200 calories.

Table 30. Percent of schools meeting calorie limit on a la carte food items.

| Source and Indicator | Year 1 | Year 2 | \% change | $p$ value |
| :--- | :--- | :--- | :--- | :---: |
| Interview | $(\boldsymbol{n}=\mathbf{1 0 2})$ | $\mathbf{( n = 9 1 )}$ |  |  |
| Percent of schools that were fully <br> compliant - 100\% of a la carte items <br> sold were 200 calories or less | 94.4 | 98.2 | 3.9 | $<0.0001$ |

Policy Point F.4: Schools may sell extra (menu) items in portions not to exceed the menu portion serving size.

Table 31. Percent of schools meeting guidelines on portion sizes for extra servings.

| Source and Indicator | Year 1 | Year 2 | \% change | $p$ value |
| :--- | :--- | :--- | :--- | :---: |
| Observation - Reimbursable Meal <br> Form | $\mathbf{( n = 6 9})$ | $\mathbf{( n = 6 4 )}$ |  |  |
| Percent of schools where the serving <br> size of an extra portion item from the <br> reimbursable meal was observed as <br> smaller or the same size as the portion <br> size in the meal | 99.6 | 99.1 | -0.5 | 0.01 |
| Percent of schools where the serving <br> size of an extra portion item from the <br> reimbursable meal was observed as <br> larger than the portion size in the meal | 0.4 | 1.0 | 150 | 0.01 |

Policy Point F.5: Schools will use marketing, pricing, and nutrition education strategies to encourage healthy extra sale selections.

Table 32. Percent of schools using various strategies to encourage healthy food item sales.

| Source and Indicator | Year 1 | Year 2 | \% change | $p$ value |
| :--- | :--- | :--- | :--- | :---: |
| Observation | $(\boldsymbol{n}=\mathbf{1 2 9})$ | $(\boldsymbol{n}=\mathbf{1 5 0})$ |  |  |
| Percent of schools where daily healthy <br> specials are advertised | 23.5 | 8.8 | -62.6 | $<0.0001$ |
| Percent of schools where nutrition <br> information is available for food items <br> without packaging | 14.8 | 9.0 | -39.2 | $<0.0001$ |
| Average number of health promotion <br> posters (per school) in the cafeteria | 7 | 8 | 11 |  |

## Section G: Methods to Increase Participation in the Child Nutrition School Breakfast and Lunch Programs

This section addresses the following policies as outlined in the MS Healthy Students Act:
Policy Point G.1: Since school food service operates like a business with income and expenses, adequate marketing ensures a successful program operation. When devising a plan, remember the following: 1) Define your business, 2) Define your customer, evaluate your plan and budget, define your objectives.

Policy Point G.2: Family education will be the key to building a healthy future for all Mississippians. Mississippi public schools offer the best resources, facilities and structure to promote family nutrition education.
Policy Point G.3a: Schools are strongly encouraged to develop academic partnerships with appropriate governmental agencies to offer family nutrition education programs.
Policy Point G.3b: Family education should be incorporated into each school’s Wellness Policy. Policy Point G.6: Schools will promote healthful eating and healthy lifestyles to students, parents, teachers, administrators and the community at school events.

Table 33. Percent of schools promoting healthy eating via meal programs, family nutrition, etc.

| Source and Indicator | Year 1 | Year 2 | \% change | $p$ value |
| :--- | :--- | :--- | :--- | :--- |
| Interview | $(\boldsymbol{n}=\mathbf{1 3 6})$ | $\mathbf{( n = 1 5 1 ~ )}$ |  |  |
| (Policy Point G.1) <br> Percent of schools with a plan to <br> promote these programs: <br> Lunch meal only <br> Breakfast meal only <br> Lunch \& breakfast meals <br> $\quad$ No plans for either meal | 6.1 |  |  |  |
| (Policy G.2) <br> Percent of schools that offered <br> resources to promote family nutrition <br> education in last year | 56.9 | 52.6 | 16.1 | -50.6 |
| (Policy G.3a) <br> Percent of schools with partnerships to <br> promote family nutrition | 28.6 | 69.6 | 20.0 | $<0.0001$ |
| (Policy G.3b) <br> Percent of schools whose Wellness <br> Policy incorporate family education | 75.0 | 17.3 | -39.5 | $<0.0001$ |

[^0]:    ${ }^{\text {a }}$ Sample n's vary across individual appliances because not all schools had each type of appliance. Data are presented only for those schools that had such an appliance in their kitchens.
