# Mississippi School Nutrition <br> Environment Evaluation Data System (MS NEEDS) 

## Technical Report Year Four (2012-2013) <br> Outcomes

The University of Mississippi

UM Research Team: Collaborators:<br>Teresa Carithers, PhD, RD, Lei Zhang, PhD, M.Sc, MBA<br>LD<br>Principal Investigator Zhen Zhang, PhD, MS<br>Laurel Lambert, PhD, RD, LD<br>Co-Principal Investigator<br>Emmy Parkes, RD, LD,<br>CDE<br>Investigator<br>Amiee Dickerson, MS<br>Project Coordinator<br>Jasmine Dixon Jones<br>Research Assistant

## Acknowledgements:

The UM researchers wish to express our appreciation to the Mississippi Department of Health (Office of Healthy Schools) and Division of Child Nutrition for their support of this project.

This research was made possible by funding provided by the Center for Mississippi Health Policy and the Robert Wood Johnson Foundation.

Note: This is a preliminary draft of research outcomes which is for review and discussion and not intended for broad distribution, as some data measures may be added or modified prior to official distribution.

## Mississippi School Nutrition Environment Evaluation Data System (MS NEEDS)

To gain an independent assessment of statewide progress in implementation of school nutrition policies, staff at the University of Mississippi conducted onsite assessments of the school nutrition environments in 150 schools in the first year,180 schools the second year, 156 schools the third and fourth year, which functioned as a statewide representative sample, to
evaluate the stage of implementation and level of compliance with Mississippi’s established policies.

Study Design. A statewide sample of schools, 150 for the first year, 180 for years 2 and 156 for year 3 and year 4, was obtained using selection probability proportional to school enrollment size to assure representation of schools with demographic mix and regional placement. The Mississippi School Nutrition Environment Evaluation Data System (MS NEEDS) instrument was designed to assess the level of nutrition policy implementation at each school, provide a comparison between schools with different demographics, and through repeated measures, show nutrition-related environmental changes over time. A statewide report, presenting cross-sectional analyses assessing statewide trends, is generated each year to provide updates for key stakeholders. The final report will include a comprehensive report of statewide progress by public health region.

The MS NEEDS instrument was used to collect data through (1) observation of school lunches (Observation Form), (2) interviewing the Child Nutrition Program (CNP) manager (Interview Form), and (3) reviewing school and district written documentation of food policies and procedures (Written Documentation Form). In addition, (4) detailed information was collected about the food and beverage items available at school stores, vending machines, and extra food items (Competitive Food Venues Forms). Please note that although the Healthy Student Act addresses school breakfast meals as well as lunch, only the lunch meals were observed. Where possible, data was collected about breakfast meals through the interview and written documents.

## METHODS

## Evaluation Design

An evaluation protocol was developed to assess the adoption of the Mississippi Health Students Act (MHS Act) in the schools' nutrition environment. The MHS Act's criteria were divided into "Policy Points" that were used to measure schools' compliance with the MHS Act. The evaluation was conducted through interviews, observations, and the manual gathering of information for the food and beverage venues within each school's child nutrition program and school grounds.

The mission of MS NEEDS was to help organize and better understand through meaningful indicators:

- The implementation status of the MHS Act throughout schools in Mississippi
- Ways the MHS Act has impacted changes in the MS school nutrition environment. .
- Barriers/challenges and successes to implementation of the MHS Act.

## Subjects \& Sampling

A total of 156 schools, 52 per school level (elementary, middle, and high school), were randomly selected to participate in year 4 of this study. Of those, 144 agreed to participate for interview (participation rate 92\%), of which there are 5 multi-level schools: 2 elementary/middle school, 1 elementary/high school, and 2 middle/high schools. According to the stratified random sampling design of the study, the elementary/middle school is used both in elementary school category and middle school category. Likewise the elementary/high school and middle/high schools are used in both respective school categories. This resulted in a final breakdown of 48 elementary schools, 50 middle schools, and 46 high schools for analyses.

Table 1. Demographics of sample

|  | All Schools <br> $(\mathrm{n}=144)$ |  | Midle <br> Elementary (n=48) |  | Migh <br> $(\mathrm{n}=50)$ | Han <br> $(\mathrm{n}=46)$ |  |  |

| Gulf Coast | 9.6 | 6.4 | 10.4 | 12.2 |

## Instruments

## Interview Form. Each school’s Child Nutrition Program (CNP) Manager provided

 information about nutrition-related policies adopted by the school and how those policies had been implemented to date. Verbal responses to both quantitative and open-ended qualitative questions, as well as data pulled from written documentation were recorded on the Interview Form. Written documentation provided by the CNP manager included the following: production records and lunch and breakfast menus from four full weeks in September, the school WellnessPolicy, food safety policies, other school nutrition-related policy documents, and CNP staff training records. Most policy points of the MHS Act were covered on the Interview Form.

Observation Form. Data about schools' implementation of the MHS Act was collected on a single day through observation. Data recorded on the Observation Form primarily documented evidence of a school's compliance within the kitchen and cafeteria settings as observed during the lunch periods. Example indicators include the following: the types of fruits, vegetables, and beverages served at lunches; whether whole grain and " 0 trans fat" foods were sold; if and how competitive foods were sold; evidence of CNP staff using written documentation for HACCP food safety plans; and ratings of the general atmosphere in terms of promoting healthier food options. Detailed information about specific food items sold were recorded on accompanying forms, the Reimbursable Meal, Vending, and Extra Food Items Foods forms, all of which were incorporated into the Observation protocol.

Reimbursable Meal Form. Data collectors documented the specific food and beverage items sold as part of the reimbursable lunch meal on the observation day. For each item they recorded a brief description, whether it was available only with the meal or if extra portions were for sale, whether the item was part of the original menu or was a substitution, and whether substitutions were reanalyzed for nutrients. In addition, if extra servings of the item were available after purchasing the meal, data collectors noted the price of the extra serving and its size in comparison to the portion served with the meal.

Extra Food Items Foods Form. Data were also collected on foods and beverages sold as extra food items during lunch periods. Data collectors recorded a description of each item, whether an item was available for sale without having purchased a meal, the item's price, and either the number of calories or enough information to determine caloric content at a later date.

Vending/School Store Form. A form was completed for each vending machine and/or school store in the school. First, data collectors documented general information about the machine or store itself including hours of operation, location, group responsible for the machine or store, and if a machine was in the faculty lounge, and whether or not students had access. Then item specific details were noted, such as manufacturer, product name, flavor, size, number of slots (vending machines only), and price.

## Procedures for Data Collection

The evaluation tool was pilot tested for clarity and validity in a local elementary and high school (who were omitted from the study) resulting in some revisions. Data collection began in October, 2011. Ten consultants (data collectors) with nutrition and/or educational backgrounds were recruited to collect data in the schools using the MS NEEDS evaluation tool. Each of the data collectors were trained in two schools before evaluating a school on their own.

The program coordinator was responsible for arranging school visits through communication with the CNP district director and the data collector assigned to the school. Once arrangements were made to visit the school, a document with all the requested written documentation was faxed or emailed to the CNP district director. The written documents were requested to be at the school when the data collector met with the CNP manager.

Interviews were conducted between October 2011 and May of 2012. Upon arrival at the school, data collectors began the evaluation process by meeting with and interviewing the CNP manager. The interview took approximately 60-90 minutes. Once the interview was completed, data collectors used their time to gather data on the competitive food venues such as vending
machines and/or school stores. The observation evaluation was conducted during the lunch periods to observe the reimbursable meal and extra food items item sales.

The evaluation took an estimated time of five to six hours. Upon completion of the evaluation, data collectors mailed or delivered the evaluation document to the program coordinator. Once the evaluation tool was received it was reviewed for quality assurance. Any missing data or data that was unclear was investigated by the program coordinator with assistance from the data collector who evaluated the school. Once data was reviewed and validated it was ready to be entered into the MS NEEDS database program.

Upon completion of data entry for all 144 participating schools, the data was forwarded to the statistician collaborator for data analysis.

#### Abstract

Analyses Descriptive statistics are presented in this report. Proportions and frequencies are presented for all schools and by school level - elementary, middle, and high school. For variables that have missing values, valid percentages are reported. Proportions were calculated using weighted frequencies to represent the school population by school levels in Mississippi.

## RESULTS

The results are presented by sections which correspond to the main policy points from the MHS Act as described above.

## Section A: Healthy Food and Beverage Choices

Policy Point A.1: A minimum of one fresh fruit or vegetable choice should be offered to students each day.

Table 3. Percent of schools that served at least one fresh fruit or vegetable at lunch

| Source and Indicator | All Schools \% | Elementary Schools \% | Middle/Jr High Schools \% | High Schools \% |
| :---: | :---: | :---: | :---: | :---: |
| Production Records | ( $\mathrm{n}=144$ ) | ( $n=48$ ) | ( $n=50$ ) | ( $\mathrm{n}=46$ ) |
| Percent of schools that served at least one fresh fruit or vegetable all 5 days of the week for: |  |  |  |  |
| Week 1 | 69.0 | 66.6 | 67.5 | 76.3 |
| Week 2 | 65.7 | 68.9 | 61.5 | 64.4 |
| Week 3 | 62.6 | 64.5 | 49.7 | 75.9 |
| Week 4 | 59.6 | 62.5 | 47.8 | 69.3 |
| All 4 Weeks | 39.1 | 39.5 | 29.4 | 51.5 |
| Percent of schools that never achieved compliance any week | 11.7 | 10.4 | 16.1 | 8.7 |
| Observation | ( $n=144$ ) | ( $n=48$ ) | ( $n=50$ ) | ( $n=46$ ) |
| Percent of schools that served at least one fresh fruit or vegetable at any time during the lunch period on the day of observation | 83.2 | 79.0 | 83.7 | 91.6 |
| Percent of schools that served at least one fresh fruit or vegetable for the entire lunch period on the day of observation | 80.0 | 77.0 | 79.6 | 87.1 |

The data collector reviewed production records for four weeks with the CNP manager. All fresh fruits and vegetables identified by the CNP manager were highlighted by the data collector. The above table reflects that while in any given week, $60 \%$ of schools or more offered a fresh fruit or vegetable on the menu, only $39 \%$ of schools offered at least one fresh fruit or vegetable for four consecutive weeks.

On average, production records showed that a higher percentage of schools were able to provide fresh fruits when compared to fresh vegetables (Table 4). This also held true across school
levels. There may be several factors contributing to the higher percentage of fresh fruit offerings. Through discussions with CNP managers, it appears that fresh fruit was more often provided through commodities than fresh vegetables. It also appears that there are more fresh fruit options than fresh vegetables that students will eat.

The same trend is shown in the observation data. A higher percentage of schools were able to serve fresh fruits (74.5\%) when compared to fresh vegetables (53.7\%).

Table 4. Percent of schools that providing fresh fruit and fresh vegetables at lunch.

| Source and Indicator | $\begin{gathered} \text { All } \\ \text { Schools } \end{gathered}$ | Elementary Schools | Middle/Jr High Schools | High Schools |

| Week 4 | 17.0 | 18.7 | 13.9 | 17.4 |
| All 4 Weeks | 3.4 | 4.1 | 0.0 | 6.3 |
| Percent of schools that never achieved compliance any week | 66.6 | 66.6 | 68.1 | 64.8 |
| Observation | ( $n=144$ ) | ( $n=48$ ) | ( $n=50$ ) | ( $n=46$ ) |
| Percent of schools that served at least one fresh fruit at any time on the day of observation | 74.5 | 72.2 | 73.8 | 80.1 |
| Percent of schools that served at least one fresh fruit for the entire lunch period on the day of observation | 66.6 | 65.9 | 65.7 | 69.3 |

| Source and Indicator | All <br> Schools | Elementary <br> Schools | Middle/Jr <br> High Schools | High <br> Schools |
| :--- | :---: | :---: | :---: | :---: |
| Observation | $\mathbf{( n = 1 4 4 ) ^ { * }}$ | $\mathbf{( n = 4 8 )}$ | $\mathbf{( n = 5 0 )}$ | $\mathbf{( n = 4 6 )}$ |
| Percent of schools that served at <br> least one fresh vegetable at any <br> time on the day of observation | 53.7 | 59.6 | 43.6 | 54.7 |
| Percent of schools that served at <br> least one fresh vegetable for the <br> entire lunch period on the day <br> of observation | 49.7 | 57.4 | 43.6 | 41.8 |

*One school has missing values.
Although the MHS Act only requires that CNPs provide one fresh fruit or one fresh vegetable daily, $57.4 \%$ of schools providing fresh fruits daily offered more than one fruit and $17.3 \%$ of schools providing fresh vegetables daily offered more than one vegetable.
Barriers
"Too expensive for schools budget"
"Lately the quality of fresh fruits and vegetables has decreased because of the freeze;
tomatoes are soft \& USDA lettuce and tomato commodities have helped; prices of fresh fruits and vegetables have increased."
"only when produce truck doesn't deliver what's ordered"
"Cost is the only barrier. They try to buy fresh fruits that are in season to save money."
"cost \& then USDA sends canned/frozen that we need to use"
"Its hard on Mon, Tue because the truck doesn't run until Tues."
"Some veggies are too expensive, like cauliflower. We'd like to serve more of a variety of veggies."
"keeping them fresh until ready to serve"
"no barriers but commodities are often nearly ruined"

## Policy Point A.2a: School menus shall offer a minimum of three different fruits weekly.

Table 5 shows that $95 \%$ of all schools were able to comply with the policy to offer at least three different fruits each week per production records. All forms of fruit (fresh, canned, frozen, preprepared, and dried) were included in the numbers. In addition, on average, schools offered more than double (7.1) the required number of fruits during lunch

Table 5. Number of fruits served weekly during the lunch period.

| Source and Indicator | $\begin{gathered} \text { All } \\ \text { Schools } \end{gathered}$ | Elementary Schools | Middle/Jr High Schools | High Schools |
| :---: | :---: | :---: | :---: | :---: |
| Production Records | ( $\mathrm{n}=144$ ) | ( $n=48$ ) | ( $n=50$ ) | ( $n=46$ ) |
| Percent of schools that served a minimum of three different fruits per week for: |  |  |  |  |
| Week 1 | 99.4 | 100.0 | 97.9 | 100.0 |
| Week 2 | 98.3 | 97.8 | 97.9 | 100.0 |
| Week 3 | 98.4 | 100.0 | 98.1 | 95.5 |
| Week 4 | 98.3 | 100.0 | 96.0 | 97.9 |
| All 4 Weeks | 94.9 | 97.8 | 89.9 | 95.5 |
| Percent of schools that never achieved compliance any week | 0.0 | 0.0 | 0.0 | 0.0 |
| Average number of fruit served per week (over the four week period) | $\begin{array}{r} \mathrm{x}=7.1 \\ \mathrm{std}=2.5 \end{array}$ | $\begin{array}{r} \mathrm{x}=7.3 \\ \mathrm{std}=1.5 \end{array}$ | $\begin{array}{r} \mathrm{x}=7.1 \\ \mathrm{std}=3.9 \end{array}$ | $\begin{array}{r} x=6.9 \\ \operatorname{std}=1.9 \end{array}$ |

Policy Point A.2b: School menus shall offer a minimum of five different vegetables weekly.
As shown in Table 6, production records indicated that $82 \%$ of all schools complied with the policy to serve a minimum five different vegetables each week. All forms of vegetables (fresh, canned, frozen, pre-prepared, and dried) were included in the numbers. On average, schools served approximately 7.5 types of vegetables weekly.

Through the CNP manager interview some barriers identified for offering

Table 6. Number of vegetables served weekly during the lunch period.

| Source and Indicator | All <br> Schools | Elementary Schools | Middle/Jr High Schools | High Schools |
| :---: | :---: | :---: | :---: | :---: |
| Production Records | ( $\mathrm{n}=144$ ) | ( $n=48$ ) | ( $n=50$ ) | ( $n=46$ ) |
| Percent of schools that served a minimum of five different vegetables per week for: <br> Week 1 <br> Week 2 <br> Week 3 <br> Week 4 <br> All 4 Weeks <br> Percent of schools that never achieved compliance any week | $\begin{array}{r} 93.1 \\ 93.9 \\ 93.7 \\ 95.7 \\ 87.4 \\ \\ 2.1 \end{array}$ | $\begin{array}{r} 93.9 \\ 95.8 \\ 93.8 \\ 97.9 \\ 91.8 \\ \\ 2.1 \end{array}$ | $\begin{array}{r} 91.9 \\ 89.9 \\ 93.9 \\ 94.1 \\ 79.7 \\ \\ 1.9 \end{array}$ | $\begin{array}{r} 93.0 \\ 95.1 \\ 93.0 \\ 93.0 \\ 88.1 \\ \\ 2.5 \end{array}$ |
| Average number of vegetables served per week (over the four week period) | $\begin{aligned} \mathrm{x} & =8.0 \\ \mathrm{std} & =2.4 \end{aligned}$ | $\begin{aligned} \mathrm{x} & =8.0 \\ \mathrm{std} & =1.6 \end{aligned}$ | $\begin{aligned} \mathrm{x} & =8.2 \\ \mathrm{std} & =3.6 \end{aligned}$ | $\begin{aligned} \mathrm{x} & =8.0 \\ \text { std } & =2.0 \end{aligned}$ |

The majority of schools reported no barriers to serving 5 different types of vegetables per week; however, managers reported that students like some vegetables such as potatoes more than others. One school foodservice manager reported a lack of choices in the vegetables he or she was able to serve.

Policy Point A2.3: Schools should try to serve dark green vegetable and/or orange fruits three times per week.

Serving dark green and/or orange vegetables or fruits at least three times a week proved to be challenging with only $14.4 \%$ of all schools meeting the criteria for all four weeks. Compliance ranged from $12.4 \%$ in elementary schools to $16.7 \%$ in high schools (Table 7). Overall, $19.7 \%$ of schools did not meet this policy for any week, this is a great improvement from that of year 3 (32\%).

Table 7. Percent of schools that served three or more dark green and/or orange fruit and vegetable types.

| Source and Indicator | All <br> Schools | Elementary <br> Schools | Middle/Jr <br> High Schools | High <br> Schools |
| :--- | :---: | :---: | :---: | :---: |
| Production Records | $\mathbf{( n = 1 4 4 )}$ | $\mathbf{( n = 4 8 )}$ | $\mathbf{( n = 5 0 )}$ | $\mathbf{( n = 4 6 )}$ |
| Percent of schools that met the |  |  |  |  |
| policy each week for: | 57.0 | 58.5 | 59.8 | 49.9 |
| Week 1 | 41.9 | 39.7 | 41.6 | 47.4 |
| Week 2 | 47.3 | 46.1 | 53.9 | 40.7 |
| Week 3 | 38.9 | 39.7 | 34.0 | 43.6 |
| Week 4 | 14.4 | 12.4 | 15.8 | 16.7 |
| $\quad$ All 4 Weeks |  |  |  |  |
| Percent of schools that never | 19.7 | 14.3 | 22.0 | 28.2 |
| achieved compliance any week |  |  |  |  |
|  |  |  |  |  |
| Percent of schools serving the 5 |  |  |  |  |
| most common types |  |  |  |  |
|  |  |  |  |  |
| Carrots | 92.4 | 93.6 | 59.9 | 62.0 |
| Sweet Potatoes | 56.4 | 56.2 | 52.1 | 60.6 |
| Turnip Greens | 59.3 | 55.9 | 63.8 | 97.9 |
| Broccoli | 90.0 | 87.4 | 88.3 | 40.8 |

The MHS Act does not identify what comprises dark green and/or orange vegetables and fruits. For Year 2, the list used was based on the Institute of Medicine’s recommendations and obtained from the Mississippi Department of Education, Office of Child Nutrition. It should be noted that CNPs following the MS Cycles II menus may find it difficult to incorporate the specific fruits and vegetables if they are not included three times per week.

Policy Point A.3: Flavored nonfat, low-fat, or reduced-fat milk shall contain no more than 160 calories per 8-ounce serving.

Table 8. Types of milk served at lunch.

| Source and Indicator | All Schools | Elementary Schools | Middle/Jr High Schools | High Schools |
| :---: | :---: | :---: | :---: | :---: |
| Observation | ( $n=144$ )* | ( $n=48$ ) | ( $n=50$ ) | ( $\mathrm{n}=46$ ) |
| Percent of schools that served a type of white milk <br> Non-fat <br> $1 \%$ fat <br> 2\% fat | $\begin{array}{r} 14.5 \\ 95.9 \\ 0.6 \end{array}$ | $\begin{array}{r} 16.8 \\ 95.7 \\ 0.0 \end{array}$ | $\begin{array}{r} 14.1 \\ 97.9 \\ 2.1 \end{array}$ | $\begin{array}{r} 10.4 \\ 93.8 \\ 0.0 \end{array}$ |

| Of the schools who served <br> juice, percentage that met the <br> criteria for all juice items | 100 | 100 | 100 | 100 |

Juice was served either in the reimbursable meal or as an extra food item.

## Section B: Healthy Food Preparation

Policy Point B.1: Schools shall comply with the existing NSLP/SBP meal pattern requirements.

Table 10. Use of meal patterns complying with NSLP.

| Source and Indicator | All <br> Schools | Elementary <br> Schools | Middle/Jr <br> High <br> Schools | High <br> Schools |
| :--- | :---: | :---: | :---: | :---: |
| Interview | $\mathbf{( n = 1 4 4 )}$ | $\mathbf{( n = 4 8 )}$ | $(\boldsymbol{n}=50)$ | $\mathbf{( n = 4 6 )}$ |
| Percent of schools that reported using a <br> valid meal pattern | 100.0 | 100.0 | 100.0 | 100.0 |
| Percent of schools using listed meal <br> pattern |  |  |  |  |
| MS Cycles II Menu and Recipes <br> MS Cycles II Recipes Only <br> MS Cycles Recipes and any other meal <br> pattern (Trad, Enhanced, Nutrikids, etc.) | 11.1 | 12.5 | 13.8 | 4.5 |
| None, no meal patterns used | 1.0 | 25.7 | 22.9 | 29.9 |

Percent of schools that combined two or more meal patterns is as follows:
All $=33.1 \%$, Elementary $=35.3 \%$, Middle $=29.7 \%$, High $=33.1 \%$
Table 11. Percent of schools confirming that food substitutions met NSLP meal patterns.

| Source and Indicator | All <br> Schools | Elementary <br> Schools | Middle/Jr <br> High Schools | High <br> Schools |
| :--- | :---: | :---: | :---: | :---: |
| Observation - Reimbursable <br> Meal Form | $\mathbf{( n = 5 6 )}^{\boldsymbol{a}}$ | $\mathbf{( n = 1 5 )}^{\boldsymbol{a}}$ | $\mathbf{( n = 1 8 )}^{\boldsymbol{a}}$ | $\mathbf{( n = 2 3 )}^{\boldsymbol{a}}$ |
| Percent of schools serving meal <br> item substitutions that re- <br> analyzed all substitutions for <br> nutrient content | $23.9 \%$ | $28.4 \%$ | $24.0 \%$ | $17.8 \%$ |

CNP managers used a reference guide referred to as the "Red book" to substitute food items to maintain nutrient integrity. Data collectors observed that substitutions tended to be foods leftover from a previous lunch meal. It is uncertain if the leftover item had been verified as meeting the nutrient requirements.

Policy Point B.2a: Schools develop and implement a food safety program by July 1, 2005.
Table12. Percent of schools that developed and implemented a food safety program.

| Source and Indicator | All <br> Schools | Elementary <br> Schools | Middle/Jr <br> High Schools | High <br> Schools |
| :--- | :---: | :---: | :---: | :---: |
| Interview | $\mathbf{( n = 1 4 4 )}$ | $\mathbf{( n = 4 8 )}$ | $\mathbf{( n = 5 0 )}$ | $\mathbf{( n = 4 6 )}$ |
| Percent of schools that <br> developed and implemented a <br> program by date of interview ${ }^{\text {a }}$ | 84.3 | 81.8 | 85.4 | 88.2 |
| Interview | $\mathbf{( n = 1 4 4 )}$ | $\mathbf{( n = 4 8 )}$ | $\mathbf{( n = 5 0 )}$ | $\mathbf{( n = 4 6 )}$ |
| Percent of schools in which the <br> manager was only aware of a <br> verbal food safety/HACCP <br> program, not a written <br> document | 1.7 | 2.1 | 2.2 | 0.0 |

Policy Point B.2b. Every school shall develop a Hazard Analysis and Critical Control Point (HACCP) system plan as required by the Child Nutrition and WIC Reauthorization Act of 2004.

Table 13. HACCP plan and compliance with individual appliance types.

| Indicator | All <br> Schools |  | Elementary <br> Schools |  | Middle/Jr High <br> Schools |  | High <br> Schools |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Observation | $\mathrm{n}^{\mathrm{a}}$ | $\%$ | $\mathrm{n}^{\mathrm{a}}$ | $\%$ | $\mathrm{n}^{\mathrm{a}}$ | $\%$ | $\mathrm{n}^{\mathrm{a}}$ | $\%$ |
| Percent of schools that |  |  |  |  |  |  |  |  |
| documented the temperature in |  |  |  |  |  |  |  |  |
| the preceding 24 hours for |  |  |  |  |  |  |  |  |
| ALL "back of house:": |  |  |  |  |  |  |  |  |
| $\quad$ Kitchen refrigerators | 141 | 93.8 | 46 | 95.6 | 49 | 94.0 | 46 | 89.6 |
| $\quad$ Kitchen freezers | 140 | 94.6 | 44 | 93.2 | 50 | 94.2 | 46 | 97.9 |
| $\quad$ Food warmers | 94 | 68.9 | 30 | 59.8 | 33 | 76.0 | 31 | 77.8 |
| $\quad$ Kitchen storerooms | 143 | 82.6 | 47 | 87.0 | 50 | 74.0 | 46 | 85.0 |
| $\quad$ Kitchen dishwashing | 110 | 60.4 | 36 | 60.9 | 40 | 50.1 | 34 | 74.0 |
| Percent of schools that |  |  |  |  |  |  |  |  |
| documented the temperature in |  |  |  |  |  |  |  |  |
| the preceding 24 hours for all |  |  |  |  |  |  |  |  |
| "front of house": |  |  |  |  |  |  |  |  |
| $\quad$ Service tray lines | 140 | 83.9 | 47 | 80.7 | 48 | 83.4 | 45 | 91.5 |
| $\quad$ Service refrigerators | 137 | 78.9 | 46 | 76.0 | 48 | 73.0 | 43 | 93.3 |
| $\quad$ Service freezers | 82 | 69.5 | 32 | 68.4 | 25 | 59.8 | 25 | 84.2 |
| $\quad$ Food warmers | 80 | 62.7 | 25 | 59.4 | 26 | 65.7 | 29 | 65.2 |
|  |  |  |  |  |  |  |  |  |

Samples vary across individual appliances because not all schools had each type of appliance.
Data are presented only for those schools that had such an appliance in their kitchens.
The most commonly used HACCP plan from USDA/NFSMI does not include specific temperature requirements for equipment, only for foods

Policy Point B.2c: Schools shall include in their School Wellness Policy (SWP) a food safety assurance program for all food offered to students through sale or service.

Table 14. Percent of schools that included a food safety assurance program in their SWP.

| Source and Indicator | All <br> Schools | Elementary <br> Schools | Middle/Jr <br> High Schools | High <br> Schools |
| :--- | :---: | :---: | :---: | :---: |
| Interview | $\mathbf{( n = 1 4 4 )}$ | $\mathbf{( n = 4 8 )}$ | $\mathbf{( n = 5 0 )}$ | $\mathbf{( n = 4 6 )}$ |
|  |  |  |  |  |
| Percent yes | 48.1 | 45.9 | 44.2 | 58.2 |
| Percent no | 3.0 | 2.2 | 1.9 | 6.3 |
| Percent not sure | 48.3 | 52.0 | 51.8 | 35.6 |
| Percent of schools with no | 0.6 | 0.0 | 2.1 | 0.0 |
| Wellness Policy document | 0.0 |  |  |  |

## Policy Point B.3: Schools shall secure a Food Service Operational Permit through the Mississippi State Department of Health for approval to operate under NSLP/SBP.

Table 15. Percentage of schools that had a valid operational permit on display in cafeteria and rating.

| Source and Indicator | All <br> Schools | Elementary <br> Schools | Middle/Jr <br> High Schools | High <br> Schools |
| :--- | :---: | :---: | :---: | :---: |
| Observation | $\mathbf{( \boldsymbol { n } = \mathbf { 1 4 4 } ) ^ { * }}$ | $\mathbf{( n = 4 8 )}$ | $\mathbf{( n = 5 0 )}$ | $\mathbf{( n = 4 6 )}$ |
| Percent of permits on display | 99.0 | 97.9 | 100 | 100 |
| Schools with an A rating | 87.1 | 87.3 | 92.0 | 80.1 |
| Schools with a B rating | 11.9 | 10.6 | 8.0 | 19.9 |

*one school has missing value.

Policy Point B.4: Mississippi Department of Health conducts two School Food Service Facility Inspections per site each school year.

Table16. Percent of schools that had two or more facility inspections in past year.

| Source and Indicator | All <br> Schools | Elementary <br> Schools | Middle/Jr <br> High Schools | High <br> Schools |
| :--- | :---: | :---: | :---: | :---: |
| Interview | $\mathbf{( n = 1 4 4 )}$ | $\mathbf{( n = 4 8 )}$ | $\mathbf{( n = 5 0 )}$ | $\mathbf{( n = 4 6 )}$ |
| Percent of schools with |  |  |  |  |
| inspections in the past year: |  |  |  |  |
| $\quad$ inspections | 1.7 | 2.2 | 2.1 | 0.0 |
| 1 inspection | 5.0 | 4.3 | 8.1 | 2.5 |
| 2 or more inspections | 93.3 | 93.6 | 89.8 | 97.5 |

Policy Point B.5a: Schools shall implement healthy school food preparation techniques using training materials developed through sources such as USDA, National Food Service Management Institute or Mississippi Department of Education.

Table 17. Materials schools used for healthy food preparation training.

| Source and Indicator | All <br> Schools | Elementary <br> Schools | Middle/Jr <br> High Schools | High <br> Schools |
| :--- | :---: | :---: | :---: | :---: |
| Interview | $\mathbf{( n = 1 4 4 )}$ | $\mathbf{( n = 4 8 )}$ | $\mathbf{( n = 5 0 )}$ | $\mathbf{( n = 4 6 )}$ |
| Percent of schools that used <br> valid training materials | 85.4 | 83.3 | 87.9 | 86.8 |
| Percent of schools using the |  |  |  |  |
| following training materials: | 47.4 | 56.1 | 42.0 | 35.9 |
| $\quad$ USDA | 31.5 | 37.4 | 26.0 | 26.1 |
| NFSMI | 50.1 | 56.2 | 45.9 | 42.8 |
| MDE | 32.8 | 31.1 | 32.0 | 37.7 |
| Other ${ }^{\text {b }}$ | 14.6 | 16.7 | 12.1 | 13.2 |
| $\quad$ No sources used |  |  |  |  |

${ }^{\text {a }}$ Valid training materials include USDA, NFSMI, and MDE materials.
${ }^{\mathrm{b}}$ Other sources reported by managers include School Foodservice Association, School Nutrition Association, Fuel Up to Play 60, Dairy Council, CNP Director, Internet, MSU Extension Service, Journals, Recipe Books, USDA Team Nutrition, Recertification Classes, School Nutrition Magazine, ServSafe, CNP Certification, T. E. A. C. H. Mississippi, Office of Healthy Schools, HACCP, professional meetings. School Cafeteria Handbook

A wide variety of training materials have been used. Schools appear to use materials that are provided to them free and are not budgeting for these activities.

Policy Point B.6a: Schools should limit fried foods whenever possible and practical.
Table 18. Number of fried food items per week served with reimbursable lunch.

| Source and Indicator | All <br> Schools | Elementary <br> Schools | Middle/Jr <br> High Schools | High <br> Schools |
| :--- | :---: | :---: | :---: | :---: |
| Interview | $\mathbf{( n = 1 4 4 ) *}$ | $\mathbf{( n = 4 8 )}$ | $\mathbf{( n = 5 0 )}$ | $\mathbf{( n = 4 6 )}$ |
| Percent of schools serving, on |  |  |  |  |
| average, this number of fried |  |  |  |  |
| items per week with the |  |  |  |  |
| reimbursable lunch meal | 8.4 | 4.2 | 11.8 | 12.9 |
| 3 or more items/week | 18.8 | 18.8 | 20.4 | 16.4 |
| 2 items/week | 9.9 | 4.2 | 13.8 | 17.1 |
| 1 item/week | 14.1 | 25.0 | 5.8 | 2.1 |
| Less than 1 item/week | 48.8 | 47.8 | 48.2 | 51.5 |
| No fried food items |  |  |  |  |
| Percent of schools where fried |  |  |  |  |
| items with reimbursable meal: | 53.1 | 55.8 | 51.9 | 48.7 |
| Stayed the same | 46.9 | 44.2 | 48.1 | 51.3 |
| Decreased in the last year | 0.0 | 0.0 | 0.0 | 0.0 |

*one school has missing value for row two of this table.
Of the schools whose number of fried food items served with reimbursable meals stayed the same during the past year, $36.4 \%$ reported already serving no fried foods with the meal.

Table 19. Number of fried food items per week served on a la carte line.

| Source and Indicator | All <br> Schools | Elementary <br> Schools | Middle/Jr <br> High Schools | High <br> Schools |
| :--- | :---: | :---: | :---: | :---: |
| Interview | $\mathbf{( n = 1 4 4 ) ^ { * }}$ | $\mathbf{( n = 4 8 )}$ | $\mathbf{( n = 5 0 )}$ | $\mathbf{( n = 4 6 )}$ |
| Percent of schools serving, |  |  |  |  |
| on average, this number of |  |  |  |  |
| fried items per week with the |  |  |  |  |
| a la carte line: |  |  | 4.2 | 11.3 |
| 3 or more items/week | 4.9 | 2.3 | 10.6 | 10.2 |
| 2 items/week | 9.9 | 9.2 | 12.6 | 0.0 |
| 1 item/week | 7.1 | 7.0 | 2.0 | 2.2 |
| Less than 1 item/week | 3.3 | 4.7 | 70.6 | 76.3 |
| No fried food items | 74.8 | 76.8 | $\mathbf{n}$ |  |
| Interview | $\mathbf{n}=\mathbf{1 4 4})^{* *}$ | $\mathbf{( n = 4 8 )}$ | $\mathbf{( n = 5 0 )}$ | $\mathbf{( n = 4 6 )}$ |
| Percent of schools where fried |  |  |  |  |
| items on extra food items: |  |  |  |  |
| Stayed the same | 71.8 | 69.3 | 74.0 | 74.5 |
| Decreased in the last year | 27.7 | 30.8 | 26.0 | 23.2 |
| Increased in the last year | 0.5 | 0.0 | 0.0 | 2.4 |

*Seven schools have missing value
*Fourteen schools have missing value.

Of the schools whose number of fried food items with the a la carte line stayed the same during the past year, $63.3 \%$ reported already serving no fried foods on extra food items.

Policy Point B.6b: Schools shall develop a long range plan for reducing and/or eliminating fried products in their lunch and breakfast menus.

Table 20. Percent of schools with a plan for reducing or eliminating fried food items.

| Source and Indicator | All <br> Schools | Elementary <br> Schools | Middle/Jr <br> High Schools | High <br> Schools |
| :--- | :---: | :---: | :---: | :---: |
| Interview | $\mathbf{( n = 1 4 3 )}$ | $\mathbf{( n = 4 8 )}$ | $\mathbf{( n = 5 0 )}$ | $\mathbf{( n = 4 6 )}$ |
| Percent of schools with Plan | 43.5 | 45.5 | 43.8 | 39.0 |
| Percent of schools who do not <br> serve fried foods | 38.1 | 37.7 | 36.4 | 41.1 |
| Percent of schools with no plan <br> or CNP manager unaware of a <br> plan | 18.4 | 16.8 | 19.8 | 19.9 |

Qualitative responses regarding a description of schools’ plans to reduce or eliminate fried foods include:
-communication from CNP director
-stating fryers will be eliminated within a certain time period
-Bake everything that can be baked.
-Only fry when necessary
-Some managers believe the plan is stated in the wellness policy.
-Plan to reduce/phase out fried food items
-Whenever equipment must be replaced, use combi-ovens instead.
-managers expect to get rid of fryers at any time
-Managers are waiting for directors to order combi-ovens
-Fryers will be replaced with combi ovens.
-Requests for combi-ovens in 3 year plans
-Schools are waiting for funds, may be able to get grants
Policy Point B.6c: The long range plan should include preparation methods using existing equipment and/or goals to replace fryers with combi-oven/steamers as budgets allow.

Table 21. Schools with plans to replace fryers.

| Source and Indicator | All <br> Schools | Elementary <br> Schools | Middle/Jr <br> High Schools | High <br> Schools |
| :--- | :---: | :---: | :---: | :---: |
| Interview | $\mathbf{( n = 1 4 4 ) ^ { * }}$ | $\mathbf{( n = 4 8 )}$ | $\mathbf{( n = 5 0 )}$ | $\mathbf{( n = 4 6 )}$ |
| Percent of schools whose long |  |  |  |  |
| range plan replaces fryers with |  |  |  |  |
| steamers and/or combi-ovens | 43.8 | 43.8 | 40.2 | 48.7 |
| Percent of schools whose long |  |  |  |  |
| range plan replaces fryers with: |  |  |  |  |
| Combi-ovens only | 33.5 | 31.3 | 32.3 | 40.2 |
| Steamers only | 1.7 | 2.2 | 2.1 | 0.0 |
| Combi-ovens and steamers | 8.6 | 10.4 | 5.9 | 8.5 |
| Neither | 9.5 | 10.4 | 11.7 | 4.6 |
| Unclear | 19.3 | 22.9 | 16.1 | 15.7 |
| Not applicable | 27.4 | 22.9 | 32.0 | 31.0 |
| Observation | $\mathbf{n = 1 4 4 ) * *}$ | $\mathbf{( n = 4 8 )}$ | $\mathbf{( n = 5 0 )}$ | $\mathbf{( n = 4 6 )}$ |
| Percent of schools with a |  |  |  |  |
| minimum of one working: | 46.0 | 46.9 | 45.9 | 44.3 |
| Fryer | 44.2 | 40.2 | 46.7 | 49.1 |
| Combi-oven | 55.9 | 59.1 | 54.8 | 50.8 |

*One school has missing values.
**Two schools have missing values.
Not applicable refers to schools with fryers that have already been replaced or schools with no fryers to be replaced. It appears that efforts are being made to decrease the use of fryers and replace fryers with combi-ovens and steamers.

## Section C: Marketing of Healthy Food Choices to Students and Staff

Policy Point C.1: Train School Foodservice Administrators, Kitchen Managers, and Cooks in Marketing, New Cooking Techniques, and Garnishing using available or newly developed training tools, such as Marketing Sense - Mississippi Department of Education, Office of Child Nutrition.

Table 22. Percent of schools whose CNP staff attended trainings in last 12 months

| Source and Indicator | All <br> Schools | Elementary <br> Schools | Middle/Jr <br> High Schools | High <br> Schools |
| :--- | :---: | :---: | :---: | :---: |
| Interview | $\mathbf{( n = 1 4 4 ) ^ { * }}$ | $\mathbf{( n = 4 8 )}$ | $\mathbf{( n = 5 0 )}$ | $\mathbf{( n = 4 6 )}$ |
| Percent of schools that reported <br> having the CNP manager attend <br> at least one training in the last <br> 12 months | 74.5 | 74.3 | 77.2 | 71.1 |
| Interview | $\mathbf{( n = 1 4 4 ) * *}$ | $\mathbf{( n = 4 8 )}$ | $\mathbf{( n = 5 1 )}$ | $\mathbf{( n = 4 6 )}$ |
| Percent of schools that reported <br> having at least one CNP staff <br> member attend at least one <br> training in the last 12 months | 62.7 | 60.9 | 61.9 | 67.6 |

*One school has missing values.
** Two schools have missing value.
Table 23. Types of trainings attended by school food service staff

| Source and Indicator | All <br> Schools | Elementary <br> Schools | Middle/Jr <br> High Schools | High <br> Schools |
| :--- | :---: | :---: | :---: | :---: |
| Interview | $\mathbf{( n = 1 4 4 )}{ }^{*}$ | $\mathbf{( n = 4 8 )}$ | $\mathbf{( n = 5 0 )}$ | $\mathbf{( n = 4 6 \boldsymbol { b } )}$ |
| Percent of schools whose CNP |  |  |  |  |
| Manager attended a training on: | 28.3 | 27.0 | 30.9 | 27.8 |
| Marketing | 25.4 | 22.9 | 29.0 | 26.1 |
| New cooking techniques | 22.2 | 22.7 | 26.9 | 15.0 |
| Garnishing | 48.7 | 49.7 | 47.7 | 47.7 |
| Other $^{\text {a }}$ |  |  |  |  |
| Percent of schools whose CNP |  |  |  |  |
| staff attended a training on: | 9.1 | 8.4 | 10.3 | 9.1 |
| Marketing | 10.5 | 8.2 | 12.4 | 12.9 |
| New cooking techniques | 8.8 | 8.2 | 10.2 | 8.3 |
| Garnishing | 49.3 | 45.6 | 52.0 | 54.0 |
| Other |  |  |  |  |

* Two school has missing data.
a Other included: Certified Food Service Program; Annual area school nutrition association; Recertification class through the state; Manager training, etc.
b Other included: ServSafe \& other food safety trainings, Staff development/MS school nutrition association; State CNP manager training; Healthy eating - State CNPmeeting, etc.

Policy Point C.2: Use the Whole School Approach in Marketing the Local Wellness Policy. Administration, faculty, staff, students, and parents need to be solicited to be a part of the implementation of the Local Wellness Policy.

Table 24. Members of school district wellness committees.

| Source and Indicator | All <br> Schools | Elementary <br> Schools | Middle/Jr <br> High Schools | High <br> Schools |
| :--- | :---: | :---: | :---: | :---: |
| Interview | $\mathbf{( n = 1 4 4 ) *}$ | $\mathbf{( n = 4 8 )}$ | $\mathbf{( n = 5 0 )}$ | $\mathbf{( n = 4 6 )}$ |
| Percent of schools without a <br> wellness committee | 7.5 | 7.4 | 8.5 | 6.4 |
| Percent of schools whose |  |  |  |  |
| wellness committees include |  |  |  |  |
| administration, faculty, staff, | 18.4 | 17.5 | 17.1 | 21.7 |
| students, and parents. |  |  |  |  |
| Percent of schools with the |  |  |  |  |
| following types wellness |  |  |  |  |
| committee members: |  |  |  |  |
|  | 17.1 | 15.3 | 12.7 | 26.0 |
| School board members | 17.5 | 15.3 | 23.9 | 13.2 |
| Superintendent | 66.9 | 67.7 | 68.2 | 63.7 |
| School principals | 56.3 | 52.6 | 59.8 | 58.7 |
| Teachers | 35.8 | 42.6 | 23.0 | 40.2 |
| PE Teacher | 51.5 | 50.6 | 61.6 | 39.9 |
| School nurses | 43.8 | 39.8 | 42.1 | 53.0 |
| Other school staff | 41.6 | 48.0 | 38.4 | 33.9 |
| CNP director | 39.7 | 27.4 | 45.0 | 55.5 |
| CNP staff | 57.8 | 57.6 | 49.5 | 68.7 |
| Parents | 34.8 | 35.0 | 25.6 | 46.3 |
| Other community members | 18.8 | 22.3 | 12.9 | 20.3 |
| Health professionals | 28.5 | 24.8 | 25.5 | 39.1 |
| Students |  |  |  |  |

*12 Schools have missing data.
School CNP staff was identified as members in $39.7 \%$ of schools that had school wellness committees. Since a significant part of school wellness policies revolve around the school nutrition environment and the CNP programs it is important that CNP representatives have a voice regarding school wellness directives.

## Section D: Food Preparation Ingredients and Products

Policy Point D.1: School districts shall adopt the Dietary Guideline recommendation that trans fatty acids will be kept "as low as possible".

Table 25. School emphasis on reduction of trans fatty acids.

| Source and Indicator | All <br> Schools | Elementary <br> Schools | Middle/Jr <br> High Schools | High <br> Schools |
| :--- | :---: | :---: | :---: | :---: |
| Interview | $\mathbf{( n = 1 4 4 )}{ }^{*}$ | $\mathbf{( n = 4 8 )}$ | $\mathbf{( n = 5 0 )}$ | $\mathbf{( n = 4 6 )}$ |
| Percent of schools reporting that |  |  |  |  |
| nutrient analyses address trans- |  |  |  |  |
| fat in: |  |  |  |  |
|  | 57.7 | 54.1 | 59.8 | 62.7 |
| Lunch menus | 31.7 | 29.6 | 34.4 | 32.3 |
| Breakfast menus | 30.6 | 28.3 | 34.4 | 30.2 |
| Lunch and breakfast menus | 11.2 | 10.9 | 10.3 | 12.8 |
| Neither menu | 30.1 | 33.4 | 30.2 | 22.7 |
| Respondent unsure for lunch | 37.4 | 41.1 | 40.9 | 24.4 |
| Respondent unsure for breakfast |  |  |  |  |

*Nine school has missing value.
NOTE: It was identified that the nutrient analysis included with the MS Cycles II menus does not include trans fat. An alternative means of nutrient analyses would need to be conducted to identify the trans fat in the school lunch menu.

Policy Point D.2: Wherever possible and practical, school lunch and breakfast programs shall include products that are labeled " 0 " grams trans fat.

Table 26. Percent of schools incorporating "0 trans fat" products into meal program foods

| Source and Indicator | All <br> Schools | Elementary <br> Schools | Middle/Jr <br> High Schools | High <br> Schools |
| :--- | :---: | :---: | :---: | :---: |
| Interview (for lunch menus) | $\mathbf{( n = 4 4 ) ^ { * }}$ | $\mathbf{( n = 1 3 )}$ | $\mathbf{( n = 1 5 )}$ | $\mathbf{( n = 1 6 )}$ |
| Of the schools that found "0 <br> trans fat" products, percent that <br> incorporated at least one "0 trans <br> fat" product into: <br> Lunch menus | 100.0 | 100.0 | 100.0 | 100.0 |
| Interview (for breakfast menus) | $\mathbf{( n = 3 0 ) * *}$ | $\mathbf{( n = 8 )}$ | $\mathbf{( n = 1 2 )}$ | $\mathbf{( n = 1 0 )}$ |
| Of the schools that found "0 <br> trans fat" products, percent that <br> incorporated at least one "0 trans <br> fat" product into: <br> Breakfast menus a | 100.0 | 100.0 | 100.0 | 100.0 |
| Observation | $\mathbf{n}$ |  |  |  |
| Percent of schools at which a <br> product labeled "0 trans fat" was <br> observed at lunch | 19.1 | 21.2 | 20.7 | 12.5 |

*For Lunch: 100 schools either made no attempt to find "0 trans fat" product; Or, made attempt but no product were found. For this analysis $n=44$.
**For breakfast: 114 schools either made no attempt to find "0 trans fat" product, Or, made attempt but no product were found. For this analysis $n=30$.
***Two schools have missing value.
Percentage of managers who learned which state bid products are " 0 trans fat" from the State Child Nutrition Program office:
o All schools= $26.7 \%$ ( 11 schools have missing value)
o Elementary schools = 20.1\%
o Middle schools = 30.7\%
o High schools = 35.7\%
NOTE: CNP managers are not fully aware of the nutritional significance of incorporating foods with " 0 trans fat" into the school lunch menus. Increases in training regarding the nutritional benefits of decreasing the amount of trans fats in the diet and increased awareness of 0 trans fat foods offered through the state bid may support an increase in 0 trans fat foods offered in the CNP.

Policy Point D.3: Schools shall incorporate whole grain products into daily and weekly lunch and breakfast menus based on product availability and student acceptability.

Table 27. Percent of schools incorporating whole grain products into meal program foods

| Source and Indicator | All <br> Schools | Elementary Schools | Middle/Jr High Schools | High Schools |
| :---: | :---: | :---: | :---: | :---: |
| Interview | ( $\mathrm{n}=144$ ) | ( $n=48$ ) | ( $n=50$ ) | ( $n=46$ ) |
| Percent of schools that incorporated at least one whole grain product into: <br> Lunch menus <br> Breakfast menus Lunch and breafast menus Neither menu | $\begin{array}{r} 98.4 \\ 86.6 \\ 85.6 \\ 0.6 \end{array}$ | $\begin{array}{r} 97.8 \\ 89.6 \\ 87.5 \\ 0.0 \end{array}$ | $\begin{array}{r} 98.1 \\ 86.1 \\ 86.1 \\ 1.9 \end{array}$ | $\begin{array}{r} 100 \\ 80.9 \\ 80.9 \\ 0.0 \end{array}$ |
| Observation | ( $n=144$ )* | ( $n=48$ ) | ( $n=50$ ) | ( $n=46$ ) |
| Percent of schools that served a minimum of one whole grain product in at least one lunch | 61.4 | 63.6 | 59.6 | 59.0 |
| Percent of schools that served a minimum of one whole grain product at all lunches | 60.6 | 63.6 | 59.6 | 55.7 |
| Observation | ( $n=87$ ) | ( $n=30$ ) | ( $n=30$ ) | ( $n=27$ ) |
| Of the schools that served a minimum of one whole grain product in at least one lunch, Percent of schools at which a whole grain product was labeled as whole grain | 22.4 | 33.3 | 9.9 | 14.5 |

One school has missing value.
Interview: Percentage of managers who learned which state bid products are whole grain from the State Child Nutrition Program office.

> All schools =50.5\%
o Elementary schools $=51.1 \%$
o Middle schools=46.3\%
o High schools=55.1\%

## Section E: Minimum and Maximum Time Allotment for Students and Staff at Breakfast and Lunch Periods

Policy Point E.1: Schools shall schedule at least a minimum of 24 minutes to ensure an adequate eating time for school lunch.

Table 28. Percent of schools at which students have enough time to eat lunch.

| Source and Indicator | All <br> Schools | Elementary <br> Schools | Middle/Jr <br> High Schools | High <br> Schools |
| :--- | :---: | :---: | :---: | :---: |
| Interview | $\mathbf{( n = 1 4 4 )}$ | $\mathbf{( n = 4 8 )}$ | $\mathbf{( n = 5 0 )}$ | $\mathbf{( n = 4 6 )}$ |
| Frequency with which students <br> have adequate time to eat their <br> school lunch meal (\% schools): <br> None of the time |  |  |  |  |
| Some of the time <br> Most of the time <br> Always | 0.9 | 0.0 | 0.0 |  |
| Observation $^{\text {a }}$ | 5.6 | 8.2 | 4.0 | 4.2 |
| Percent of schools providing at <br> least 24 minutes for all observed | 57.3 | 17.1 | 30.2 | 21.9 |
| lunches ${ }^{\text {a }}$ |  |  |  |  |

*One school has missing value.
The maximum number of lunch periods observed was four. Procedure for beginning and ending lunch periods varied among schools. Most schools used either a bell for ending the lunch period or a staggered system where yada yada
Actual arrival and departure times of students is beyond CNP control.
"Teachers not keeping on the schedule"
"If there is a fire drill or tornado warning, the children cannot get to the cafeteria to eat.
"Some lunches have more students than others. Also, training the cashiers can cause the line to back up. Some food items take longer to serve than others."
"Students moving slowly through the line slow things down."
"The lines slow them down on certain days with labor-intensive menus (nachos take longer to serve)."
"complicated menus"
"Every so often supply \& demand-If they run out of an item some meals are affected. No routinely."
"Hold up with testing can be a problem. When this happens, students who are testing are provided with bag lunches."
"When staff is short handed they can only run one line and they cannot get the students through efficiently."
"Students should have 30 min. to eat every meal! School policy doesn't allow students to fully participate in the learning by rushing them through meals. They all need to be able to learn how to behave during meals."
"They talk."
"sometimes teachers bring students in a few min. late so other classes will be late also.
2-3 times/month"
"They don't have enough time to get through the line \& eat. Also, the cashier speed affects the speed of the line."
"Depends on what we're serving"
"CNP manager feels that the younger grades need more time to eat."

NOTE: Some uncertainty as to the required number of minutes required for lunch times. Some schools identified 18 minutes as the minimum time allowed.
Policy Point E.2: Schools should take into consideration the recommend time of $\mathbf{1 0}$ minutes for a child to eat school breakfast after they have received the meal.

Table 29. Percent of schools at which students have enough time to eat breakfast.

| Source and Indicator | All <br> Schools | Elementary <br> Schools | Middle/Jr <br> High Schools | High <br> Schools |
| :--- | :---: | :---: | :---: | :---: |
| Interview | $\mathbf{( n = 1 4 4 ) *}$ | $\mathbf{( n = 4 8 )}$ | $\mathbf{( n = 5 0 )}$ | $\mathbf{( n = 4 7 )}$ |
| Frequency with which students |  |  |  |  |
| have adequate time to eat their |  |  |  |  |
| breakfast meal (\% schools): | 0.7 | 0.0 | 2.2 | 0.0 |
| None of the time | 6.5 | 6.6 | 4.3 | 9.3 |
| Some of the time | 9.2 | 8.9 | 8.2 | 11.5 |
| Most of the time | 83.6 | 84.5 | 85.4 | 79.2 |
| Always |  |  |  |  |

*Seven schools do not serve breakfast, two schools have missing value

## Section F: The Availability of Food Items during the Lunch and Breakfast Periods of the Child Nutrition Breakfast and Lunch Programs

Policy Point F.1: Schools districts shall comply with the Mississippi Board of Education Policy of Competitive Food Sales as outlined in Mississippi Board of Education Policies.

The four MDE competitive food sales policies are the following:

1. No food items will be sold on the school campus for one (1) hour before the start of any meal services period.
2. The school food service staff shall serve only those foods which are components of the approved federal meal patterns being service (or milk products) and such additional foods as necessary to meet the caloric requirement of the age group being served.
3. With the exception of milk products, a student may purchase individual components of the meal only if the full meal unit also is being purchased.
4. Students who bring their lunch from home may purchase water and milk products.

This preliminary baseline report will address policies \#1 and \#4. Policies \#2 and \#3 will be addressed in future years once the reimbursable meal data can be analyzed in more detail. Data will be presented, however, which describe Child Nutrition Managers' experiences with barriers
to complying with all four competitive food sales policies, and whether these policies are incorporated into any school or district level policy documents.

Table 30. Percentage of schools complying with Competitive Food Sales Policy \#1

| Source and Indicator | All <br> Schools | Elementary <br> Schools | Middle/Jr <br> High Schools | High <br> Schools |
| :--- | :---: | :---: | :---: | :---: |
| Interview | $\mathbf{( n = 1 4 4 )}$ | $\mathbf{( n = 4 8 )}$ | $\mathbf{( n = 5 0 )}$ | $\mathbf{( n = 4 6 )}$ |
| Percent of schools reporting that <br> no competitive food sales are <br> made within 1 hour of any meal | 90.6 | 91.6 | 88.0 | 91.7 |
| Percent of schools at which <br> competitive food sales were <br> observed within the hour prior <br> to lunch via vending machines <br> and/or school stores <br> (Denominator: all schools in <br> sample). | 2.1 | 0.0 | 3.9 | 4.2 |

Over $90 \%$ schools do not sell to students one hour prior to any meal via vending machines or school stores. This includes 44 elementary schools, 44 middle schools, and 42 high schools.

Interview Percentage of schools that have this policy written in a document
o All schools: 68.7\%
o Elementary schools: 73.0\%
o Middle schools: 60.1\%
o High schools: 71.2\%
NOTE: CNP managers are aware of competitive food policies.

Table 31 Venues for food sales at schools in violation of Competitive Food Sales Policy \#1.

[^0]Table 32. Percent of schools complying with Competitive Food Sales Policy \#4

| Source and Indicator | All <br> Schools | Elementary <br> Schools | Middle/Jr <br> High Schools | High <br> Schools |
| :--- | :---: | :---: | :---: | :---: |
| Observation | $\mathbf{( n = 1 4 4 ) *}$ | $\mathbf{( n = 4 8 )}$ | $\mathbf{( n = 5 0 )}$ | $\mathbf{( n = 4 6 )}$ |
| Percent of schools observed <br> where a student purchased a <br> milk or water product without <br> purchasing a reimbursable meal | 38.8 | 39.8 | 39.3 | 36.2 |

*Five schools have missing value.
NOTE: These percentages only reflect direct observation by the data collector.

Policy Point F.2: School districts shall update the wellness policy to address limiting the number of extra sale items that may be purchased with a reimbursable meal. This policy will exclude extra beverage purchases of milk, juice and/or water.

Table 33. Percent of schools incorporating this policy into the School Wellness Policy

| Source and Indicator | All <br> Schools | Elementary <br> Schools | Middle/Jr <br> High Schools | High <br> Schools |
| :--- | :---: | :---: | :---: | :---: |
| Interview | $\mathbf{( n = 1 4 4 )}$ | $\mathbf{( n = 4 8 )}$ | $(\boldsymbol{n}=50)$ | $\mathbf{( n = 4 6 )}$ |
| Percent of schools that <br> incorporated this policy into <br> their School Wellness Policy | 27.6 | 25.0 | 25.9 | 35.6 |

Approximately 48\% schools answered "not sure" about whether or not the School Wellness Policy addressed limiting the number of extra sale items that may be purchased with a reimbursable meal.

NOTE: While this policy was identified as being included in the school wellness policy there was no endeavor to investigate implementation of the policy.

Policy Point F.3: Schools may sell extra items in individual packages not to exceed 200 calories.

Table 34. Percent of schools meeting calorie limit on Extra Food Items food items

| Source and Indicator | All <br> Schools | Elementary <br> Schools | Middle/Jr <br> High Schools | High <br> Schools |
| :--- | :---: | :---: | :---: | :---: |
| Observation - Extra Food <br> Items Form | $\mathbf{( n = 1 2 1 )}$ | $\mathbf{( n = 4 1 )}$ | $\mathbf{( n = 4 2 )}$ | $\mathbf{( n = 3 8 )}$ |
| Percent of schools that were <br> fully compliant - 100\% of <br> Extra Food Items sold were <br> 200 calories or less | $97.7 \%$ | $97.6 \%$ | $100 \%$ | $95.0 \%$ |

NOTE; While most schools are trying to comply with meeting the calorie limit, several schools still offered 1 or 2 items that did not meet the 200 calorie requirement. Non-compliant items included:
o Sun Chips
o Cheez Its
o Doritos
o Baked Doritos
o Funyuns
o Ranch Dressing
o Rainbow Pop-ups
o Ham and Cheese Sandwiches
o Steak and cheese Sandwiches
o French Fries
o Frosted Flakes
Policy Point F.4: Schools may sell extra (menu) items in portions not to exceed the menu portion serving size.

Table 35. Percent of schools meeting portion size for extra meal item

| Source and Indicator | All <br> Schools | Elementary <br> Schools | Middle/Jr <br> High Schools | High <br> Schools |
| :--- | :---: | :---: | :---: | :---: |
| Observation - <br> Reimbursable Meal Form |  |  |  |  |
| Percent of schools where all <br> the serving size of an extra <br> portion item from the <br> reimbursable meal was <br> observed as smaller or the <br> same size as the portion size <br> in the meal | $\mathbf{( n = 6 2 ) *}$ | $\mathbf{( n = 1 0 )}$ | $\mathbf{( n = 2 6 )}$ | $\mathbf{( n = 2 6 )}$ |
| Percent of schools where all <br> the serving size of an extra <br> portion item from the <br> reimbursable meal was <br> observed as larger than the <br> portion size in the meal | $1.2 \%$ | $100.0 \%$ | $100.0 \%$ | $96.3 \%$ |

*Schools where extra meal item is not observed were not included in this analysis. Extra food items in $72.2 \%$ of schools were not observed.

Policy Point F.5: Schools will use marketing, pricing, and nutrition education strategies to encourage healthy extra sale selections.

Table 36. Percent of schools using various strategies to encourage healthy food item sales.

| Source and Indicator | All Schools | Elementary Schools | Middle/Jr High Schools | $\begin{gathered} \text { High } \\ \text { Schools } \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: |

| Percent of schools that reported discussing the following strategies to promote healthy food sales: <br> Marketing <br> Pricing <br> Education | $\begin{array}{r} 59.8 \\ 8.3 \\ 50.7 \end{array}$ | $\begin{aligned} & 62.4 \\ & 10.7 \\ & 52.0 \end{aligned}$ | $\begin{array}{r} 55.9 \\ 5.9 \\ 46.0 \\ \hline \end{array}$ | $\begin{array}{r} 59.2 \\ 6.6 \\ 54.3 \end{array}$ |
| Observation | ( $n=140$ )* | ( $n=48$ ) | ( $n=50$ ) | ( $n=46$ ) |
| Percentage of schools at which consultants observed the following strategies: <br> Daily healthy specials are advertised <br> Healthy marketing in cafeteria <br> Nutrition information available for foods items without packaging <br> USDA meal food looks appealing | $\begin{array}{r} 5.8 \\ 34.1 \\ 1.0 \\ 56.9 \end{array}$ | $\begin{array}{r} 4.3 \\ 32.6 \\ 2.2 \\ 60.6 \end{array}$ | $\begin{array}{r} 6.2 \\ 37.0 \\ 0.0 \\ 55.3 \end{array}$ | $\begin{array}{r} 8.5 \\ 33.5 \\ 0.0 \\ 51.2 \end{array}$ |
| Observation | $(\mathrm{n}=144)^{* *}$ | ( $n=48$ ) | $(\mathrm{n}=50)$ | ( $n=46$ ) |
| Average number of health promotion posters - nutrition promotion and milk promotion --per school in the cafeteria or lunch line area | 6.7 (0-31) | 6.6 (0-31) | 6.9 (0-28) | 6.5 (0-28) |
| Percent of schools with posters in the cafeteria for: <br> Nutrition promotion <br> Milk promotion | $\begin{aligned} & 59.9 \\ & 66.8 \end{aligned}$ | $\begin{aligned} & 61.8 \\ & 61.8 \end{aligned}$ | $\begin{aligned} & 60.9 \\ & 69.7 \end{aligned}$ | $\begin{aligned} & 54.7 \\ & 73.5 \end{aligned}$ |

*Four schools have missing value.
** Three schools have missing value.
NOTE: There is no definition for "Marketing" identified in the policy. Marketing could be viewed as a poster on the wall. In documenting number and types of posters in the cafeteria it was identified that the most frequently seen posters (i.e. milk) were free and mailed to the CNP manager.

## Section G: Methods to Increase Participation in the Child Nutrition School Breakfast and Lunch Programs

This section addresses the following policies as outlined in the MS Healthy Students Act: Policy Point G.1: Since school food service operates like a business with income and expenses, adequate marketing ensures a successful program operation. When devising a plan, remember the following: 1) Define your business, 2) Define your customer, evaluate your plan, and budget. Define your objectives.

Policy Point G.2: Family education will be the key to building a healthy future for all Mississippians. Mississippi public schools offer the best resources, facilities, and structure to promote family nutrition education.

Policy Point G.3a: Schools are strongly encouraged to develop academic partnerships with appropriate governmental agencies to offer family nutrition education programs.

Policy Point G.3b: Family education should be incorporated into each school’s Wellness Policy.
Policy Point G.6: Schools will promote healthful eating and healthy lifestyles to students, parents, teachers, administrators and the community at school events.

Table 37. Percent of schools promoting healthy eating via meal programs, family nutrition, etc.

| Source and Indicator | All <br> Schools | Elementary <br> Schools | Middle/Jr <br> High Schools | High <br> Schools |
| :--- | :---: | :---: | :---: | :---: |
